TOONIOOS W2-DC

TOONIOOS Cat Water Fountain Battery W2-DC Instruction Manual

1. INTRODUCTION

This manual provides essential instructions for the proper use, installation, operation, and maintenance of your TOONIOOS Cat Water Fountain Battery, Model W2-DC. This rechargeable battery is designed to power compatible wireless cat water fountains, offering convenience and extended operation.

Image 1.1: The TOONIOOS Cat Water Fountain Battery (Model W2-DC). This image displays the compact, black cylindrical battery

unit with its charging port and control interface.

2. PRODUCT FEATURES

- **Fast Charging:** Equipped with a Type-C interface, the battery fully charges in approximately 6 hours, minimizing downtime for your cat's water fountain.
- **Easy to Replace:** The independent design allows for straightforward removal and replacement. Keeping a spare battery ensures continuous operation of your cordless cat water fountain.
- **Wireless Convenience:** Powers your cat water fountain without the need for cords, enabling flexible placement in various locations within your home.
- **Long Battery Life:** The 4000mAh rechargeable battery provides an ultra-long standby time, capable of powering a compatible cordless cat water fountain for up to 60 days on a single full charge.

Image 2.1: An illustration highlighting the safety and convenience of a wireless cat water fountain, powered by this battery, compared to a corded alternative. This emphasizes avoiding tripping hazards and chewing risks.

3. SETUP

3.1 Initial Charging

1. Locate the Type-C charging port on the battery unit.
2. Connect a compatible Type-C charging cable to the battery and a suitable power adapter (not included).
3. Allow the battery to charge for approximately 6 hours until fully charged. The charging indicator (if present on your fountain or battery) will typically change color or turn off when charging is complete.

3.2 Battery Installation

1. Ensure your wireless cat water fountain is turned off and disconnected from any power source.
2. Locate the battery compartment on your specific cat water fountain model. Refer to your fountain's manual for exact instructions.
3. Carefully insert the fully charged TOONIOOS W2-DC battery into the designated compartment, ensuring

proper alignment of contacts.

4. Secure the battery compartment cover.

Image 3.1: A cat approaching a stainless steel wireless water fountain, illustrating the typical environment where the TOONIOOS battery would be used. The battery powers the pump within such a fountain.

4. OPERATING INSTRUCTIONS

4.1 Powering the Fountain

Once the battery is installed, refer to your cat water fountain's instruction manual to power it on and select desired operating modes. The TOONIOOS W2-DC battery provides the necessary power for the fountain's pump and other functions.

4.2 Battery Life Monitoring

The 4000mAh capacity allows for up to 60 days of operation, depending on the fountain's usage patterns and mode settings. Monitor your fountain's battery indicator (if available) or observe changes in water flow to determine when recharging is necessary.

5. MAINTENANCE

5.1 Battery Charging

To maintain optimal battery performance, recharge the battery fully when its power level is low. Avoid completely draining the battery frequently, as this can reduce its overall lifespan.

5.2 Filter Replacement (for compatible fountains)

For fountains using filters, it is recommended to replace the filter every two weeks to ensure clean water and proper fountain operation. This practice also helps maintain the efficiency of the fountain's pump, which is powered by the battery.

5.3 Storage

If storing the battery for an extended period, ensure it is partially charged (around 50-80%) and stored in a cool, dry place. Avoid extreme temperatures.

6. TROUBLESHOOTING

- **Battery Not Charging:**

- Ensure the Type-C charging cable is securely connected to both the battery and the power adapter.
- Verify that the power adapter is functioning correctly and plugged into a live outlet.
- Try using a different Type-C cable and power adapter to rule out faulty accessories.

- **Short Battery Life:**

- Confirm the battery was fully charged (approximately 6 hours) before use.
- Check your cat water fountain's operating mode; continuous operation modes consume more power than intermittent modes.

- Ensure the fountain's pump is clean and free of debris, as a clogged pump can draw more power.
- **Fountain Not Working After Battery Replacement:**
 - Verify that the battery is correctly installed in the fountain's compartment, with contacts properly aligned.
 - Ensure the battery is sufficiently charged.
 - Refer to your cat water fountain's manual for specific troubleshooting steps related to its power system.

7. SPECIFICATIONS

Specification	Detail
Model Number	W2-DC
Battery Type	Rechargeable (1 A battery included)
Capacity	4000mAh
Charging Interface	Type-C
Full Charge Time	Approximately 6 hours
Estimated Standby Time	Up to 60 days (varies by fountain usage)
Dimensions	9.3 x 7.7 x 6.3 cm
Weight	190 g
Color	Black
Material	Plastic
Manufacturer	TOONIOOS
Country of Origin	China

8. WARRANTY AND SUPPORT

For warranty information and customer support regarding your TOONIOOS Cat Water Fountain Battery W2-DC, please refer to the documentation provided with your original purchase or contact TOONIOOS customer service directly. Contact details can typically be found on the product packaging or the official TOONIOOS website.

ASK A QUESTION ABOUT THIS MANUAL

Ask about setup, troubleshooting, compatibility, parts, safety, or missing instructions. Manuals+ will review the question and use this page’s manual context to help answer it.
