# Does the Box work in my car?

1. Press Carbitlink, easy connection or Phonelink icon in your screen

2. Press setting button on top corner

3. Press about to enter version menu

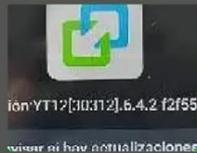

4. the version is TW12 (2412).6.9-9cXXXTW12 (2412), it shows car brand. Then .6.9 - means version 6.9, it works good. others not important.

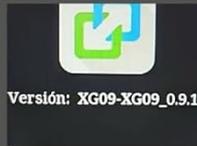

The version is 5.2, works good. DX8S, X90, X70  
 The version above 6.0, works good. HongQi, Geely and so on  
 The version is 5.1, Not Work. like cS35, GX3

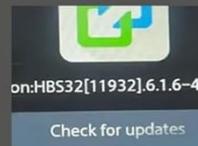

CS35 version 5.1 Doesn't work

CS35 version 6.4 working

Hunter Special version working

CS95 22 version 6.1 working

CS95 19 version 5.1 Doesn't work

Image 2.2: A chart detailing CarbitLink software versions and their compatibility with the dongle. Versions 5.2, 6.0, and above are generally compatible, while version 5.1 and specific models like CS35 version 5.1 are not.

## 3. SETUP INSTRUCTIONS

Follow these steps to set up your autoabc Wireless CarbitLink USB Dongle:

1. **Connect the Dongle:** Plug the USB dongle into your car's original USB port. Ensure the connection is secure.
2. **Access Mobile Connect:** On your car's infotainment screen, navigate to the 'Mobile Connect' or 'Easy Connection' option. This will display a QR code or a prompt to connect your phone via Bluetooth.
3. **Pair via Bluetooth:** On your smartphone, go to Bluetooth settings and search for available devices. Select the device named "Carplay&Auto\_XXXX" (where XXXX is a unique identifier). Confirm the pairing request on both your phone and the car screen.
4. **Automatic Interface Launch:** Once Bluetooth pairing is successful, the CarPlay or Android Auto interface will automatically launch on your car's display.

## 4. OPERATING INSTRUCTIONS

Once connected, you can utilize the features of Apple CarPlay or Android Auto:

### 4.1. Apple CarPlay Operation

- **Navigation:** Use online map applications for real-time directions.
- **Music & Audio:** Stream music, podcasts, and audiobooks through your car's sound system. CarPlay audio is output through the original car's Bluetooth channel with lossless sound quality.
- **Phone Calls:** Make and receive calls directly from the car's display.

- **Voice Control:** Activate Siri for hands-free control of various functions.

Image 4.1: An example of the Apple CarPlay interface on a car's infotainment screen, showing access to phone, maps, messages, and music applications.

## 4.2. Android Auto Operation

- **Navigation:** Access Google Maps or other compatible navigation apps.
- **Music & Audio:** Play music from Spotify, YouTube Music, or other streaming services. Android Auto audio is output through the original car's Bluetooth channel with lossless sound quality.
- **Phone Calls:** Manage calls with a clear interface.
- **Voice Control:** Use Google Assistant for voice commands.

## 5. MAINTENANCE

The autoabc Wireless CarbitLink USB Dongle is designed for minimal maintenance. Keep the device clean and dry. Avoid exposing it to extreme temperatures or direct sunlight for prolonged periods. Ensure the USB connection port remains free of dust and debris.

## 6. TROUBLESHOOTING

If you encounter issues with your autoabc Wireless CarbitLink USB Dongle, refer to the following troubleshooting steps:

- **No Connection/Initial Pairing Issues:**

- Ensure the dongle is securely plugged into the car's USB port.
- Verify your car's infotainment system has 'Carbit Link', 'Smart Link', 'Phone Link', or 'Easy Connect' functionality (version 6.0 or above).
- Restart your smartphone and the car's infotainment system.
- Delete any previous Bluetooth pairings for the dongle on your phone and car, then attempt to re-pair.

- **Intermittent Connection/Lag:**

- Ensure your phone's Wi-Fi and Bluetooth are enabled and not connected to other devices that might interfere.
- Check for any obstructions between your phone and the dongle.
- Update your smartphone's operating system to the latest version.

- **Audio Quality Issues:**

- Confirm that your car's Bluetooth is selected as the audio output source.
- Adjust volume levels on both your phone and car system.

- **CarbitLink Version Incompatibility:**

- Refer to Image 2.2 in the Compatibility Requirements section to verify if your car's CarbitLink version is supported. If not, the dongle may not function.
