Maintenance

Regular maintenance ensures optimal performance and extends the lifespan of your eufy Robot Vacuum Omni C20.

1. Dust Bag Replacement

The All-in-One Station uses disposable dust bags. When the dust bag is full, the station will notify you. Replace the dust bag as necessary to maintain optimal emptying performance. The 3.1L dust bag can hold debris for up to 60 days without manual emptying in a typical household.

2. Cleaning the Rolling Brush

Periodically check the rolling brush for tangled hair or debris. Use the included cleaning tool or scissors to cut and remove any tangled material. The Pro-Detangle Comb helps reduce tangles and maintenance.

3. Cleaning Side Brushes

Inspect side brushes for wear or damage. Clean any accumulated dust or hair. Replace if bristles are bent or missing.

4. Cleaning Sensors and Charging Contacts

Wipe the sensors and charging contacts on both the robot and the station with a clean, dry cloth to ensure proper function.

5. Water Tank Maintenance

The All-in-One Station features transparent water tanks. Monitor water levels and refill the clean water tank as needed. Empty and clean the dirty water tank regularly to prevent odor and buildup.

- **Poor cleaning performance:** Check and clean the rolling brush, side brushes, and dust bag. Ensure the dust bag is not full. Clean sensors.
- **Mop not cleaning effectively:** Ensure the clean water tank is filled and the mop pads are properly attached and clean.
