Devos LightRanger 1200

Devos LightRanger 1200 LED Tripod Lantern Instruction Manual

MODEL: DLP1200C

Introduction

The Devos LightRanger 1200 is a high-performance LED tripod lantern designed for versatile outdoor illumination. It features adjustable height, powerful brightness, and a long-lasting rechargeable battery, making it suitable for various activities such as camping, hiking, and backyard use. This manual provides essential information for the safe and effective operation and maintenance of your LightRanger 1200.

OWN THE NIGHT

HIGH-POWER LED LANTERN

USB-C rechargeable lantern with up to **1200 lumens** of brightness, providing overhead lighting for camping, overlanding, outdoor cooking, and nighttime activities.

Product Overview

The LightRanger 1200 offers robust features for reliable outdoor lighting:

- **Powerful 1200 Lumens Brightness:** Illuminates a wide 60 ft diameter area.
- **Customizable Adjustable Height:** 4-section aluminum pole extends from 36.5" to 108" (3-9 ft).
- **Long-Lasting Battery Performance:** Up to 3.75 hours on max brightness or 80 hours on low settings.
- **Portable and Lightweight Design:** Weighs 5.25 lbs and includes a convenient carrying bag.
- **Built for Outdoor Durability:** Constructed from sturdy aluminum, water-resistant.

LIGHT AT NEW HEIGHTS

- > Adjusts up to **9 feet tall**
- > Collapses to 37 inches
- > Durable, aluminum pole
- > Weatherproof construction
- > Keeps bugs up and out of face

Setup Instructions

- Unpack Components:** Remove the LightRanger 1200, telescoping pole, tripod base, USB-C charging cord, and carrying bag from the packaging.
- Attach Tripod Base:** Securely attach the tripod base to the bottom of the telescoping pole. Ensure all locking mechanisms are engaged.
- Extend Tripod Legs:** Spread the three legs of the tripod base outwards until they are fully extended and stable on a flat surface.
- Extend Telescoping Pole:** Loosen the locking collars on the pole sections. Carefully extend the pole to your desired height, up to 9 feet. Tighten each locking collar to secure the pole sections in place.
- Attach Light Head:** The LED light head is typically pre-attached. If detached, align the light head with the top of the pole and press it down until it clicks securely into place.

Operating Instructions

1. **Power On/Off:** Press the power button located on the light head once to turn the unit on. Press it again to turn it off.
2. **Adjust Brightness:** While the light is on, press and hold the power button to cycle through brightness levels. Release the button at your desired brightness. The light can be dimmed to 20% of its maximum output.
3. **Change Lighting Modes:** Double-press the power button to switch between different lighting modes: all four sides illuminated (360°), two sides illuminated (180°), or one side illuminated.
4. **Charging:** Connect the provided USB-C cable to the charging port on the light head and to a compatible USB power source. The battery indicator will show charging status.

PACKED WITH POWER

- > Up to 80 HOURS of run time
- > USB-C Rechargeable
- > Charges from 0 to 60% in 1 hour
- > Charges other devices
- > Compatible with Devos Solar Panel and extra battery packs

80 HOUR RUN TIME

QUICK USB-C CHARGING

Maintenance

- **Cleaning:** Wipe the exterior of the lantern and pole with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners.
- **Storage:** When not in use, collapse the telescoping pole and tripod legs. Store the LightRanger 1200 in its provided carrying bag in a cool, dry place away from direct sunlight.
- **Battery Care:** For optimal battery life, fully charge the unit before long-term storage and recharge it every 3-6 months to prevent deep discharge.

Troubleshooting

- **Light Not Turning On:** Ensure the battery is charged. Connect to a power source and allow it to charge for at least 30 minutes before attempting to power on.
- **Short Battery Life:** Verify the unit is fully charged. Operating at maximum brightness will consume battery faster. Reduce brightness or use fewer illuminated sides to extend runtime.
- **Instability:** Ensure the tripod legs are fully extended and placed on a stable, level surface. Check that all pole locking collars are securely tightened.

Technical Specifications

Feature	Specification
Model Number	DLP1200C
Brightness	1200 Lumens (Max)
Adjustable Height	36.5" to 108" (3-9 ft)
