## SETUP

---

1. **Unpack:** Carefully remove all packaging materials and inspect the kettle for any damage.

3. **Place on Stable Surface:** Position the power base on a dry, flat, heat-resistant surface.
4. **Connect Power:** Plug the power cord into a standard electrical outlet. Utilize the cord wrap feature on the base to manage excess cord length.

## OPERATING INSTRUCTIONS

---

1. **Fill Kettle:** Remove the kettle from its power base. Open the lid and fill the kettle with fresh, cold water. Do not fill below the MIN mark or above the MAX fill line indicated inside the kettle.
2. **Secure Lid:** Place the lid firmly back onto the kettle. Ensure it is properly seated to prevent steam from escaping during boiling.
3. **Place on Base:** Position the kettle securely onto its 360-degree power base.
4. **Start Boiling:** Press the one-touch boil switch located at the base of the handle downwards. The indicator light will illuminate, signifying that the kettle is heating.

6. **Pour Water:** Carefully lift the cordless kettle from its base and pour the hot water using the precision gooseneck spout.
7. **Re-boil (if needed):** If the kettle has cooled, you can repeat the process to boil water again.

## MAINTENANCE AND CLEANING

---

Proper care will ensure the longevity and performance of your kettle.

- **Product Care Instructions:** Hand Wash.
- **Exterior Cleaning:** Wipe the exterior of the kettle with a soft, damp cloth. Do not use abrasive cleaners or scouring pads, as they may damage the finish.
- **Interior Cleaning (Descaling):** Over time, mineral deposits (limescale) may build up inside the kettle, especially in hard water areas. To descale:
  - a. Fill the kettle with a solution of equal parts water and white vinegar (or a commercial descaling

solution).

- b. Bring the solution to a boil and let it sit for at least 30 minutes, or longer for heavy buildup.
- c. Discard the solution and rinse the interior thoroughly with fresh water several times.
- d. If necessary, repeat the process.

- **Storage:** When not in use, ensure the kettle is clean and dry. Store it on its power base or in a cool, dry place.
