- **Warped or Misaligned Parts:** In rare cases, a piece of wood might be slightly warped, affecting flush fitting. Double-check the assembly steps and ensure all fasteners are securely tightened without over-tightening.
- **Drawer Operation:** If drawers do not slide smoothly, ensure the drawer slides are correctly installed and aligned. Check for any obstructions within the tracks. If the stool prevents the upper drawer from opening, ensure the stool is fully pushed in or consider placing a mat underneath for easier movement.
