MVMT 28000440

MVMT Classic II Men's 3 Hand Automatic Watch Instruction Manual

Model: 28000440

1. SETUP

Carefully remove the watch from its packaging. Inspect the watch for any visible damage. Ensure all protective films are removed from the watch face and case back.

1.1 Initial Winding

As an automatic watch, the MVMT Classic II is powered by the motion of your wrist. If the watch has stopped, it may require an initial manual wind. Gently rotate the crown clockwise about 20-30 times while it is in the first (normal) position. This will build up a power reserve. The watch will then continue to wind itself with regular wear.

1.2 Setting the Time

To set the time, gently pull the crown (the knob on the side of the watch) out to the second position. Rotate the crown clockwise or counter-clockwise to adjust the hour and minute hands. Once the correct time is set, push the crown back in fully to ensure water resistance and to start the watch.

1.3 Bracelet Adjustment

The stainless steel bracelet can be adjusted to fit your wrist. This typically involves removing or adding links. For precise adjustment, it is recommended to visit a professional jeweler or watch repair service. Improper adjustment can damage the bracelet or watch.

2. OPERATING THE WATCH

2.1 Automatic Movement

The MVMT Classic II features a Japanese Miyota 82SO automatic movement. This movement is self-winding, meaning it harnesses the kinetic energy from your wrist's natural motion to power the watch. Regular daily wear will keep the watch wound and running accurately.

2.2 Power Reserve

When fully wound, the watch has a power reserve that allows it to continue running for a period even when not being worn. If the watch is left unworn for an extended period and stops, simply follow the initial winding instructions in Section 1.1.

2.3 Water Resistance

The watch is water resistant up to 5 ATM (50 meters). This rating indicates that the watch is suitable for everyday use, such as splashes, rain, and brief immersion in water. It is not designed for swimming, showering, or diving. Always ensure the crown is fully pushed in before any contact with water to maintain its water resistance.

3. MAINTENANCE

3.1 Cleaning

To clean your watch, wipe the case and bracelet with a soft, damp cloth. For stubborn dirt on the stainless steel, a mild soap solution can be used, followed by thorough rinsing with a damp cloth and drying. Avoid using harsh chemicals, solvents, or abrasive materials, as these can damage the watch's finish.

3.2 Storage

When not in use, store your watch in a cool, dry place, away from direct sunlight and extreme temperatures. The original watch box provides excellent protection.

3.3 Professional Servicing

Automatic movements benefit from periodic professional servicing, typically every 3-5 years, to ensure optimal performance and longevity. Consult an authorized watch service center for maintenance.

4. TROUBLESHOOTING

- Watch Not Running:** Ensure the watch has been sufficiently wound (refer to Section 1.1) and that the crown is fully pushed in. If the watch has been stationary for a long time, it may require more movement or manual winding to restart.
- Time Inaccuracy:** Mechanical watches, including automatic movements, may exhibit slight variations in timekeeping. If the inaccuracy is significant or sudden, ensure the watch has a sufficient power reserve. If issues persist, professional servicing may be required.
- Condensation Under Crystal:** If you notice condensation inside the watch crystal, it indicates a potential breach in the water resistance. This requires immediate attention from a professional watch repair service to prevent damage to the movement.

5. SPECIFICATIONS

Feature	Detail
Model Number	28000440
Movement	Japanese Miyota 82SO Automatic
Case Diameter	42mm
Water Resistance	5 ATM / 50 Meters
Case Material	Stainless Steel
Glass Material	Hardened Mineral Crystal
Clasp Type	Push Button Deployment Clasp
Package Dimensions	6.1 x 3.7 x 2.6 inches
Item Weight	6.24 ounces

6. WARRANTY & SUPPORT

6.1 Two-Year Guarantee

The MVMT Classic II watch comes with a two-year guarantee from the date of purchase, covering manufacturing defects. This warranty does not cover normal wear and tear, accidental damage, or damage resulting from improper use or unauthorized repairs.

6.2 Customer Support

For warranty claims, service requests, or any questions regarding your MVMT Classic II watch, please contact MVMT customer support. You can find contact information and further details on the official MVMT website or by visiting the [MVMT Store on Amazon](#).
