Honey-Can-Do SHF-10023

Honey-Can-Do 4-Tier Slim Profile Wide Shelving Unit

Model: SHF-10023

1. PRODUCT OVERVIEW

The Honey-Can-Do 4-Tier Slim Profile Wide Shelving Unit is designed to provide efficient and versatile storage in various spaces, including kitchens, garages, pantries, and basements. Constructed from 100% steel with a polished finish, this unit offers exceptional durability and rust resistance. Its slim 10-inch depth makes it ideal for narrow areas, while the 48-inch width maximizes storage capacity along walls. Each of the four shelves is height-adjustable and can support up to 100 pounds, offering flexible organization for a wide range of items. Assembly is straightforward and requires no tools, featuring simple plastic couplers and leveling feet for stability.

This image displays the fully assembled Honey-Can-Do 4-Tier Slim Profile Wide Shelving Unit, showcasing its practical use in a kitchen environment. The shelves are organized with jars, baskets, and other kitchen essentials, highlighting its storage capacity and sleek design.

2. SAFETY INFORMATION

Please read and understand all safety instructions before assembly and use.

- Always assemble the shelving unit strictly according to the instructions provided in this manual.
- Do not exceed the maximum weight limit of **100 pounds (45.36 kg) per shelf**. Overloading can lead to structural failure and injury.
- Ensure the unit is placed on a level and stable surface. Use the adjustable leveling feet to achieve proper balance before placing any items on the shelves.
- Distribute weight evenly across each shelf to prevent tipping or instability.
- Keep small children and pets away from the unit during assembly to prevent accidents.
- Regularly inspect the unit for any signs of damage or loose connections. Do not use if damaged.

3. COMPONENTS LIST

Before beginning assembly, ensure all parts are present and undamaged. If any parts are missing or damaged, please contact Honey-Can-Do customer support.

- 4 x Vertical Poles (in sections)
- 4 x Wire Shelves
- 16 x Plastic Couplers (2 halves per shelf support)
- 4 x Adjustable Leveling Feet
- Assembly Instructions (this manual)

4. SETUP AND ASSEMBLY

The Honey-Can-Do shelving unit is designed for easy, tool-free assembly. Follow these steps carefully:

1. **Prepare the Area:** Choose a clear, flat, and stable surface for assembly.
2. **Attach Leveling Feet:** Screw the four adjustable leveling feet into the bottom of the four lower pole sections. Ensure they are securely tightened.
3. **Assemble Poles:** Connect the pole sections by screwing them together. The poles are typically threaded to allow for easy connection. You will have four full-length vertical poles once assembled.
4. **Install Plastic Couplers:** Determine the desired height for your bottom shelf. Snap two halves of a plastic coupler together around each of the four vertical poles at the same desired height. Ensure they are all at the same level to keep the shelf even. There are grooves on the poles to guide placement.
5. **Place Bottom Shelf:** Carefully slide the first wire shelf down over the four poles until it rests firmly on the plastic couplers. Press down gently on each corner of the shelf to ensure it is fully seated.
6. **Install Remaining Shelves:** Repeat step 4 and 5 for the remaining three shelves, adjusting the height of the plastic couplers as desired for each shelf. Ensure all couplers for a single shelf are at the same height.
7. **Final Check:** Once all shelves are in place, gently push down on each shelf to ensure it is securely seated. Adjust the leveling feet at the bottom of the unit to ensure the entire shelving unit is stable and does not wobble.

5. OPERATING AND USAGE

Once assembled, your Honey-Can-Do shelving unit is ready for use. Consider the following for optimal performance:

- **Weight Distribution:** Always distribute items evenly across the shelves. Avoid concentrating heavy items in one spot or on one side of the unit.
- **Adjusting Shelf Height:** To adjust a shelf's height, first remove all items from that shelf. Then, lift the shelf off its plastic couplers. Remove the couplers, reposition them to the desired height on all four poles, and then lower the shelf back onto the couplers.
- **Placement:** The slim profile of this unit makes it ideal for narrow spaces, such as against longer walls, behind furniture, or in closets and pantries.

- **Versatility:** This unit is suitable for various room types including bathrooms, garages, home gyms, laundry rooms, and living rooms, providing versatile storage solutions.

Maximize your storage potential with this

Holds 100lbs. per shelf

The shelving unit is shown here in a garage or utility setting, demonstrating its versatility for organizing tools, gardening supplies, and other household items. Its slim profile allows it to fit efficiently against walls, maximizing storage in compact spaces.

6. MAINTENANCE

To ensure the longevity and appearance of your shelving unit, follow these simple maintenance guidelines:

- **Cleaning:** Wipe down the shelves and poles regularly with a soft, damp cloth. For stubborn dirt, a mild soap solution can be used. Avoid abrasive cleaners or scouring pads, as they may damage the polished finish.
- **Drying:** After cleaning, dry the unit thoroughly with a clean, dry cloth to prevent water spots and maintain its rust-resistant properties.
- **Inspection:** Periodically check all connections, especially the plastic couplers and leveling feet, to ensure they remain secure. Tighten leveling feet if necessary.
- **Environment:** While rust-resistant, prolonged exposure to excessive moisture or corrosive substances should be avoided to preserve the finish.

7. TROUBLESHOOTING

If you encounter any issues with your shelving unit, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit wobbles or is unstable	Uneven floor surface; leveling feet not adjusted; shelves not fully seated.	Adjust the leveling feet at the bottom of the poles until the unit is stable. Ensure all shelves are pressed down firmly onto their plastic couplers.
Shelf is not level	Plastic couplers are not at the same height on all four poles.	Remove items from the shelf. Lift the shelf and reposition the plastic couplers on all four poles to the exact same height, using the pole grooves as a guide. Re-seat the shelf.
Difficulty assembling poles	Threads are misaligned or dirty.	Ensure poles are aligned straight before twisting. Clean any debris from threads if necessary. Do not force.
Shelf slides down	Plastic couplers not fully snapped together or not properly seated in pole grooves.	Remove items and shelf. Ensure both halves of each plastic coupler are fully snapped together around the pole and securely seated in the desired groove. Re-seat the shelf firmly.
