7. TROUBLESHOOTING

If you encounter any issues with your VINGLI Accent Chair AC117, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Chair feels unstable or wobbly.	Legs or frame connections are loose.	Ensure all four legs are screwed in tightly. Check and re-tighten any bolts connecting the backrest or other frame components.

Squeaking noise when sitting.	Loose connections in the frame or legs.	Inspect all assembly points and tighten any loose bolts or screws. Ensure the chair is on a level surface.
Fabric has minor indentations.	From packaging during transit.	Minor indentations usually resolve themselves over time with use. Gently steam or lightly mist with water and smooth if necessary, but test on an inconspicuous area first.
