

OutIn Nano

OutIn Nano Portable Espresso Machine

INSTRUCTION MANUAL

1. Product Overview

The OutIn Nano Portable Espresso Machine is designed for convenience and high-quality espresso on the go. It features fast self-heating capabilities and a 20-bar pressure system to ensure rich crema with every shot. This compact and lightweight device supports both coffee grounds and capsules, offering versatility for various coffee preferences.

Key Features:

- **Lightweight & Portable:** Weighs only 670 grams, making it easy to carry.
- **Fast Self-Heating:** Heats 1.7 oz (50ml) of 77°F (25°C) water to 198°F (92°C) within 200 seconds.
- **Rich Crema:** 20-bar pressure system ensures optimal extraction for a smooth espresso with rich crema.
- **Double Espresso Capability:** Designed to conveniently brew a double shot of espresso.
- **Durable Construction:** Made of food-grade stainless steel and sustainable materials.
- **Easy to Clean:** Simple to disassemble and wash.

3. Setup

- 1. Initial Charge:** Before first use, fully charge the OutIn Nano using the provided USB-C cable. The LED indicator lights will show charging progress.
- 2. First Use Cleaning:** Disassemble all removable parts (water tank, coffee basket, cup) and wash them with warm, soapy water. Rinse thoroughly and dry completely before reassembly.
- 3. Assembly:** Ensure all components are correctly assembled according to the diagrams in the manual. The coffee basket or capsule adapter should be securely attached to the brewing head.

4. Operating Instructions

The OutIn Nano offers flexibility for brewing with either coffee grounds or capsules.

Using Coffee Grounds:

1. **Grind Coffee:** Use 6-8g of fine grind coffee.
2. **Fill Basket:** Place the coffee grounds into the grounds basket.
3. **Tamp (Optional):** Lightly tamp the coffee grounds for optimal extraction.
4. **Attach Basket:** Securely attach the filled grounds basket to the brewing head of the machine.

Using Capsules:

1. **Insert Capsule:** Place a compatible NS Original Line capsule into the capsule adapter.
2. **Attach Adapter:** Securely attach the capsule adapter to the brewing head of the machine.

OutIn

2 IN 1

 **Compatible with NS Original Line**

 **6-8g Fine Grind**

The OutIn Nano is compatible with both NS Original Line capsules and 6-8g of fine grind coffee.

Brewing Process:

1. **Add Water:** Fill the water tank with cold or room temperature water (up to 1.7 oz / 50ml for a single shot, or more for a double shot if using the double shot accessories).
2. **Place Cup:** Position your espresso cup or the included cup beneath the brewing head.
3. **Start Brewing:** Press and hold the power button for 2 seconds until the machine beeps. Release the button. The machine will begin heating the water and then extract the espresso.
4. **Enjoy:** Once extraction is complete, carefully remove your cup and enjoy your fresh espresso.

5. Maintenance

Regular cleaning ensures the longevity and optimal performance of your OutIn Nano.

Cleaning Instructions:

- **Disassembly:** After each use, allow the machine to cool. Disassemble the water tank, coffee basket/capsule adapter, and the brewing head.
- **Washing:** Wash all removable parts with warm, soapy water. Use a soft brush to remove any coffee residue.
- **Rinsing:** Rinse all parts thoroughly with clean water.
- **Drying:** Ensure all parts are completely dry before reassembling or storing the machine.
- **Important:** The OutIn Nano is **not dishwasher safe**. Hand wash only.
- **Exterior:** Wipe the exterior of the machine with a damp cloth. Do not immerse the main body in water.

Storage:

Store the machine in its carrying case in a cool, dry place when not in use.

6. Troubleshooting

If you encounter any issues with your OutIn Nano, please refer to the following common solutions:

- **Machine Not Turning On:** Ensure the machine is fully charged. Connect to a power source and check the LED indicators.
- **No Espresso Extraction:** Verify that the water tank is filled and the coffee grounds/capsule are correctly inserted and sealed. Check for any blockages in the brewing head.
- **Weak Espresso/Poor Crema:** Ensure you are using fresh, finely ground coffee (if applicable) and that the water temperature is appropriate. The 20-bar pressure system requires proper sealing of all components.
- **Leaking:** Check that all parts are securely tightened and that the seals are clean and properly seated.
