6. TROUBLESHOOTING

6.1 Connectivity Issues

If you experience difficulty connecting the camera to your network or maintaining a stable connection, please ensure:

- Your WiFi network is 2.4GHz. The camera does not support 5GHz networks.
- The camera is within range of your WiFi router.
- You have entered the correct WiFi password during setup.
- The camera's firmware is up to date via the app.

If issues persist, try resetting the camera and repeating the setup process. Refer to the app for detailed connection guides.

6.2 Live Feed and Video Playback

For continuous live feed viewing and video playback, certain features or extended cloud storage may require a subscription. Please check the DETIKO Cam app for details on available plans and features.

6.3 General Performance Issues

For any other performance concerns, such as image quality, audio problems, or battery life, ensure the camera lens is clean, the battery is fully charged, and the app is updated to the latest version. If problems continue, please contact customer support.
