Whubefy Whubefy SHP6 (7x5 inch)

Whubefy Smart Heat Press Machine User Manual

Model: Whubefy SHP6 (7x5 inch) | Brand: Whubefy

INTRODUCTION

The Whubefy Smart Heat Press Machine is designed for effortless and precise heat transfers on various materials. Its compact 7x5 inch size makes it ideal for small projects, intricate designs, and on-the-go crafting. With both manual and APP control options, it offers flexibility and ease of use for beginners and experienced crafters alike.

This manual provides comprehensive instructions for setting up, operating, and maintaining your heat press machine to ensure optimal performance and safety.

PRODUCT FEATURES

- **Smart Control:** Built-in Bluetooth technology allows connection to the Whubefy SmartHeatPress app for precise time and temperature settings, along with step-by-step guidance.
- **Dual Control Options:** Operate via the intuitive digital buttons on the machine or through the SmartHeatPress mobile application.
- **Enhanced Safety:** Features a high-temperature resistant, non-slip insulated safety base to protect your workspace, a top handle to keep hands away from the hot plate, and an automatic shut-off after 10 minutes of inactivity.
- **Quick & Even Heating:** Dual-tube heating elements (350W) provide temperatures up to 400°F (205°C) with even heat distribution across the 7x5 inch ceramic-coated heat plate.
- **Portable Design:** Lightweight and compact, making it easy to transport and store.

WHAT'S IN THE BOX

Upon unboxing your Whubefy Smart Heat Press Machine, you should find the following items:

- Whubefy Smart Heat Press Machine (7x5 inch)
- Insulated Safety Base
- Foam Mat (for surface protection)
- User Manual
- Two Test Transfer Papers
- Convenient Storage Bag
- Power Cord (18AWG x 2C 5.9ft)

All items included in the Whubefy Smart Heat Press Machine package.

SETUP

1. Unpack all components from the box.
2. Place the insulated safety base on a stable, heat-resistant surface.
3. Place the foam mat on top of the safety base to provide a protective layer for your project and workspace.
4. Connect the power cord to the heat press machine and plug it into a standard 110V power outlet.

OPERATING INSTRUCTIONS

Manual Control

1. **Power On:** Press the power button () to turn on the machine.

2. **Set Temperature:** Press the TEMP button () once, then use the up (^) and down (v) arrows to set your desired temperature. Press TEMP again to confirm.
3. **Set Time:** Press the TIMER button () once, then use the up (^) and down (v) arrows to set your desired time. Press TIMER again to confirm.
4. **Pre-press:** Place your material (e.g., T-shirt) on the foam mat. Use the heat press to smooth out any wrinkles or moisture for a few seconds.
5. **Position Design:** Place your transfer design onto the material, ensuring it is face down if required by your transfer type.
6. **Apply Heat:** Place the heat press firmly over the design. Press the Start button (**Start**) to begin the countdown. Apply medium, even pressure throughout the transfer process.
7. **Finish:** The machine will beep when the timer is complete. Carefully lift the heat press and place it back on its insulated safety base. Allow the design to cool (or peel warm, depending on your transfer material's instructions) before removing the protective sheet.

APP Control (via Bluetooth)

1. **Download App:** Download the
