Vidattx TK039

POSEIDON Wireless Tattoo Kit User Manual

Model: TK039 | Brand: Vidattx

Introduction

Welcome to the POSEIDON Wireless Tattoo Kit. This comprehensive kit is designed for beginners, starters, and apprentices, providing all the essential tools for your tattooing journey. Please read this manual carefully before use to ensure safe and effective operation.

Safety Information

Warning: Keep away from children.

Always ensure proper sterilization of all equipment before and after each use. Use disposable needles and dispose of them safely. Wear appropriate protective gear, such as gloves, during operation. Consult with a professional for proper tattooing techniques and hygiene practices.

Kit Contents

Image: All components included in the POSEIDON Tattoo Kit, neatly arranged.

Your POSEIDON Tattoo Kit includes the following items:

- 1 x POSEIDON Tattoo Pen
- 10 x Tattoo Cartridges Needles (5x 1205RL, 5x 1007CM)
- 1 x Self Cohesive Tattoo Grip Cover
- 1 x Wireless Tattoo Power Supply
- 1 x TYPE-C Charging Cable
- 40 x Ink Caps
- 2 x Practice Skin
- 2 x Transfer Paper
- 10 x 5ml Tattoo Ink
- 1 x 30ml Black Tattoo Ink
- 1 x Tattoo Gloves

- 1 x Painting Brush
- 1 x Tattoo Sticker
- 4 x Tattoo Table Mat
- 1 x Instruction Manual (this document)

Product Components Overview

POSEIDON Tattoo Pen

Image: The POSEIDON tattoo pen highlighting its high-quality motor, 5-12V working voltage, 3.5mm stroke length, and 12V 12000RPM speed.

Image: Close-up of the POSEIDON tattoo pen showing its RCA connection point for power.

Image: Comparison showing the POSEIDON tattoo pen at 105g, emphasizing its lighter weight compared to a 160g pen, which helps reduce hand pressure.

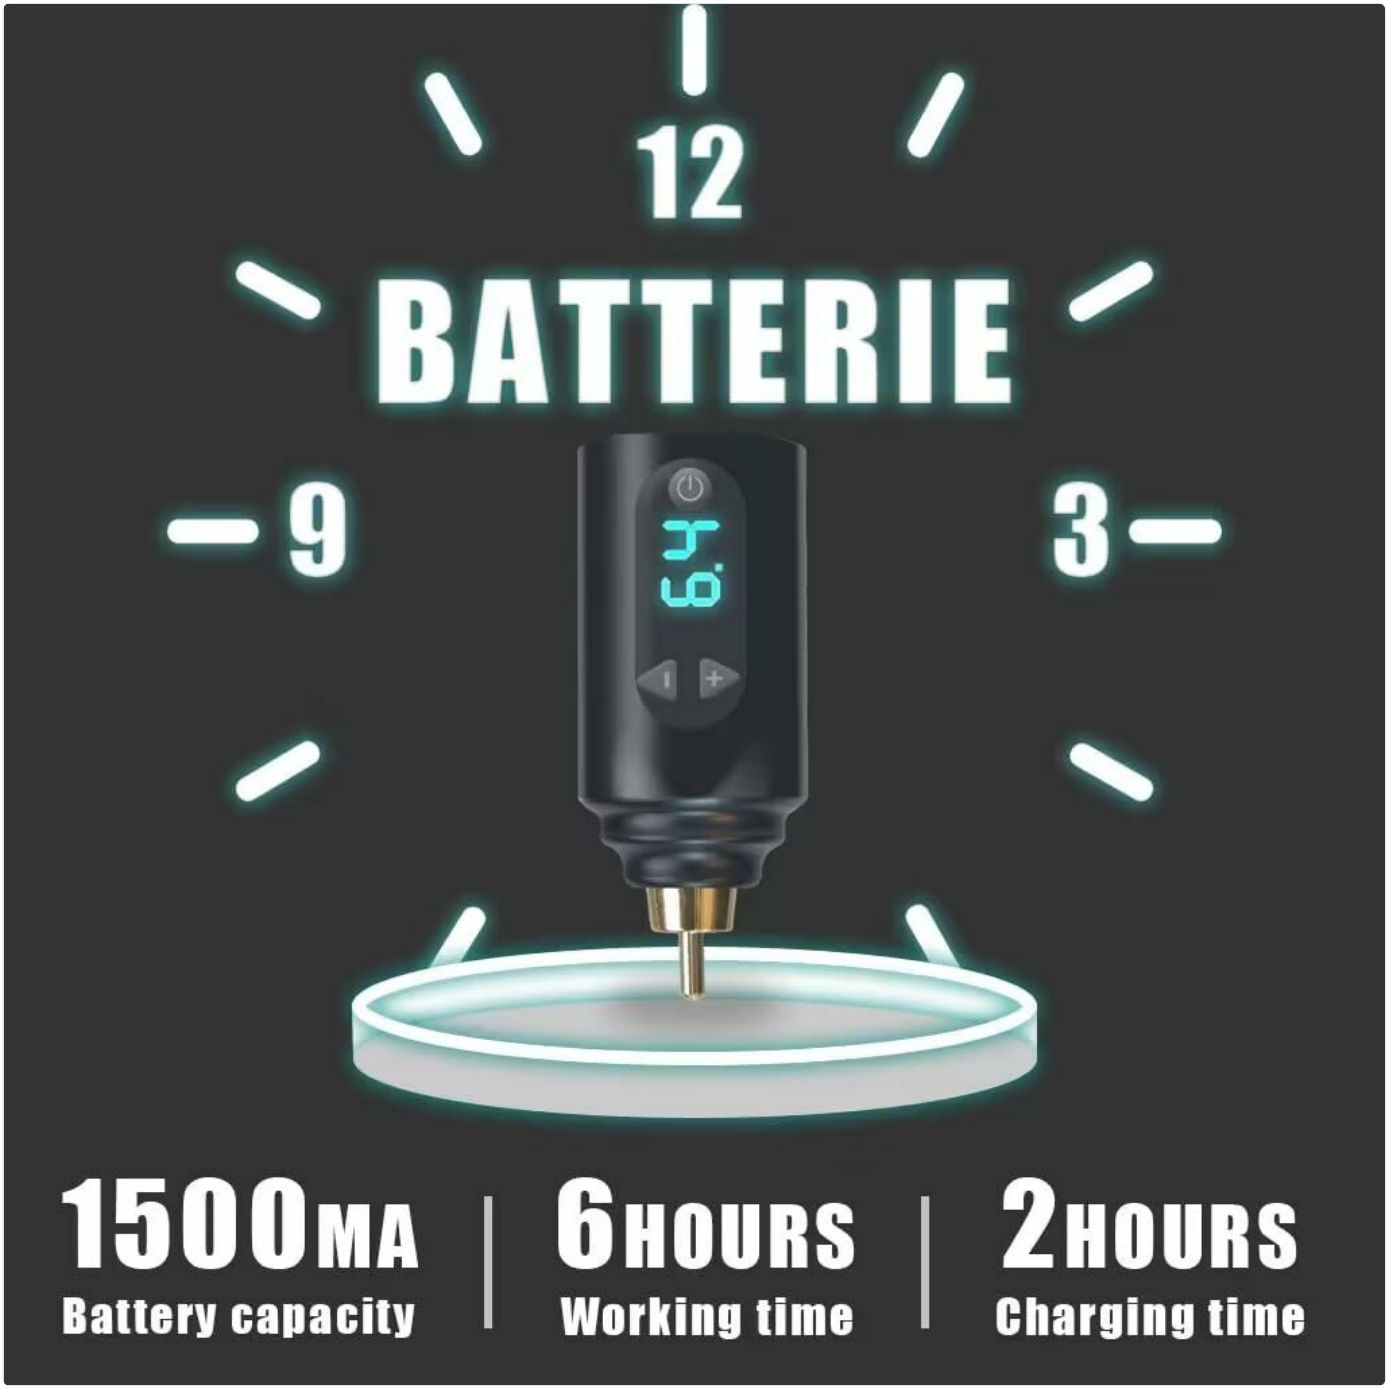

Image: The POSEIDON tattoo pen, highlighting its construction from advanced plastic material for a comfortable touch and improved tattooing experience.

The POSEIDON tattoo machine pen is crafted from premium aluminum alloy, ensuring durability and a lightweight design (approx. 105g) to reduce hand fatigue during long sessions. It incorporates advanced motor technology for consistent power and safety. The ergonomic design is compatible with all standard tattoo needles and operates within a working voltage range of 6-11V.

Tattoo Cartridge Needles

Image: A set of POSEIDON tattoo cartridge needles, showing their design and packaging.

POSEIDON tattoo cartridge needles are designed for single-use and are sterilized by EO gas, individually packaged for hygiene. The tips are made from specialized materials to ensure stable needle work, easy color absorption, and improved ink flow. The kit includes 5x 1205RL (Round Liner) and 5x 1007CM (Curved Magnum) needles.

Wireless Tattoo Power Supply

Image: Diagram illustrating the wireless tattoo battery's 1500mAh capacity, 6 hours working time, and 2 hours charging time.

The wireless tattoo power supply features a 1500mAh battery capacity, providing 3-6 hours of runtime depending on the voltage and motor usage. It offers 5-level voltage adjustment (6-11V) for versatile operation. Charging is done via the included TYPE-C cable.

Setup Instructions

1. **Charge the Power Supply:** Connect the TYPE-C charging cable to the wireless power supply and a suitable USB power adapter. Ensure the battery is fully charged before first use. A full charge typically takes about 2 hours.
2. **Attach Power Supply to Pen:** Securely connect the wireless power supply to the RCA port at the back of the POSEIDON Tattoo Pen.
3. **Insert Cartridge Needle:** Carefully unpackage a sterile tattoo cartridge needle. Align the needle with the opening at the front of the tattoo pen and push it in until it clicks securely into place.
4. **Prepare Ink:** Pour a small amount of desired tattoo ink into a clean ink cap.
5. **Prepare Work Area:** Place a tattoo table mat on your work surface. Ensure your practice skin or client's skin is

clean and prepared according to standard tattooing protocols.

Operating Instructions

1. **Power On/Off:** Long press the power button on the wireless power supply to turn the device ON or OFF. The display will illuminate when powered on.
2. **Adjust Voltage:** Use the '+' and '-' buttons on the power supply to adjust the working voltage. The voltage can be adjusted in 0.1V increments within the 6-11V range. Start with a lower voltage for lining and adjust as needed for shading or different needle types.
3. **Begin Tattooing:** Once the desired voltage is set, gently apply the needle to the practice skin or prepared area. Maintain a steady hand and consistent pressure.
4. **Monitor Battery:** Keep an eye on the battery indicator on the power supply. Recharge when the battery level is low to avoid interruptions.

Maintenance

- **Cleaning the Pen:** After each use, disconnect the power supply and remove the needle. Wipe down the exterior of the tattoo pen with a clean cloth dampened with an appropriate disinfectant solution. Do not immerse the pen in liquid.
- **Needle Disposal:** Always dispose of used tattoo cartridge needles in a designated sharps container immediately after use. Never reuse needles.
- **Power Supply Care:** Keep the wireless power supply clean and dry. Avoid dropping it or exposing it to extreme temperatures.
- **Ink Storage:** Store tattoo inks in a cool, dry place away from direct sunlight. Ensure ink caps are sealed tightly after use.

Troubleshooting

Problem	Possible Cause	Solution
Tattoo pen not turning on.	Battery is low or dead.	Charge the wireless power supply fully.
Needle not moving or moving weakly.	Low voltage setting; Needle not properly seated; Damaged needle.	Increase voltage; Re-seat the cartridge needle; Replace with a new needle.
Ink not flowing properly.	Needle clogged; Ink too thick; Insufficient ink in cap.	Clean needle tip; Dilute ink slightly (if safe for ink type); Add more ink to cap.
Pen feels hot during use.	Prolonged continuous use; High voltage setting.	Allow the pen to cool down; Reduce voltage if possible; Take breaks during long sessions.

Specifications

Model: TK039

Brand: Vidattx

Tattoo Pen Material: Premium Aluminum Alloy / Advanced Plastic Material

Tattoo Pen Weight: Approximately 105g

Working Voltage: 6-11V (5-level adjustment)

Stroke Length: 3.5mm

Motor Speed: 12V 12000RPM

Battery Capacity: 1500mAh Lithium Ion

Battery Runtime: 3-6 hours (depending on voltage/motor)

Charging Time: Approximately 2 hours

Charging Port: TYPE-C

Needle Compatibility: All standard tattoo cartridge needles

Package Dimensions: 8.19 x 6.06 x 3.94 inches

Package Weight: 1.72 Pounds

UPC: 763312195689
