5. MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your BEASTCOM Q3 Gaming PC.

- **Cleaning:** Regularly dust the exterior of the PC case and ensure ventilation grilles are clear. Use compressed air to gently clean internal components, especially fans and heatsinks, every few months.
- **Software Updates:** Keep your Windows 11 Pro operating system, drivers, and applications updated to the latest versions for security and performance improvements.
- **Ventilation:** Ensure the PC is placed in an area with adequate airflow. Avoid placing it in enclosed spaces or directly against walls that could obstruct vents.

6. TROUBLESHOOTING

This section addresses common issues you might encounter with your BEASTCOM Q3 Gaming PC.

Issue	Possible Solution
PC does not power on	Check if the power cable is securely connected to both the PC and the wall outlet. Ensure the power supply unit (PSU) switch on the back of the PC is in the 'I' (On) position. Try a different power outlet.
No display on monitor	Verify that the monitor cable is securely connected to both the PC and the monitor. Ensure the monitor is powered on and set to the correct input source (HDMI/DisplayPort). Try connecting to a different video output port on the PC.
No internet connection	For Wi-Fi, ensure the antenna is attached and Wi-Fi is enabled in Windows settings. For wired, check the Ethernet cable connection and ensure your router is functioning correctly. Restart your router and modem.

Issue	Possible Solution
Slow performance or freezing	Close unnecessary background applications. Ensure Windows and all drivers are up to date. Run a system scan for malware or viruses. Check system temperatures to ensure the PC is not overheating.
RGB lighting not working or stuck	Ensure all internal RGB connections are secure. Press the RGB control button on the top panel to cycle through modes or reset the lighting.
