

## Bruni Bruni Basics-Clear 4053664319274

# User Manual: Bruni Screen Protector for Senbono V6

Model: Bruni Basics-Clear 4053664319274

## 1. INTRODUCTION AND OVERVIEW

This manual provides comprehensive instructions for the installation, use, and maintenance of your Bruni Screen Protector, specifically designed for the Senbono V6 device. This protective film is engineered to safeguard your device's display from scratches and impacts while maintaining optimal touch sensitivity and visual clarity.

Please note: The Senbono V6 features a curved display. Consequently, the Bruni Protector Film is intentionally designed to be slightly smaller than the full display area to ensure proper adhesion and prevent lifting at the edges.

## 2. PRODUCT FEATURES

- **Precision Fit:** Accurately developed and compatible with the Senbono V6.
- **Durable Material:** Made of scratch-resistant, highly transparent PET material.
- **Easy Application:** Can be applied easily and without bubbles.

- **Residue-Free Removal:** Can be removed or repositioned at any time without leaving residue.
- **Optimal Adhesion:** Glue-free film ensures optimal edge adhesion and no slipping once attached.
- **Touch Optimization:** Unadulterated display of screen contents and no impairment of usability on touch displays.
- **Made in Germany:** Manufactured with high-quality standards.

# BENEFITS

Simple  
installation

Sensitive  
Touch

Safe and  
scratch-resistant

Clear  
Colors

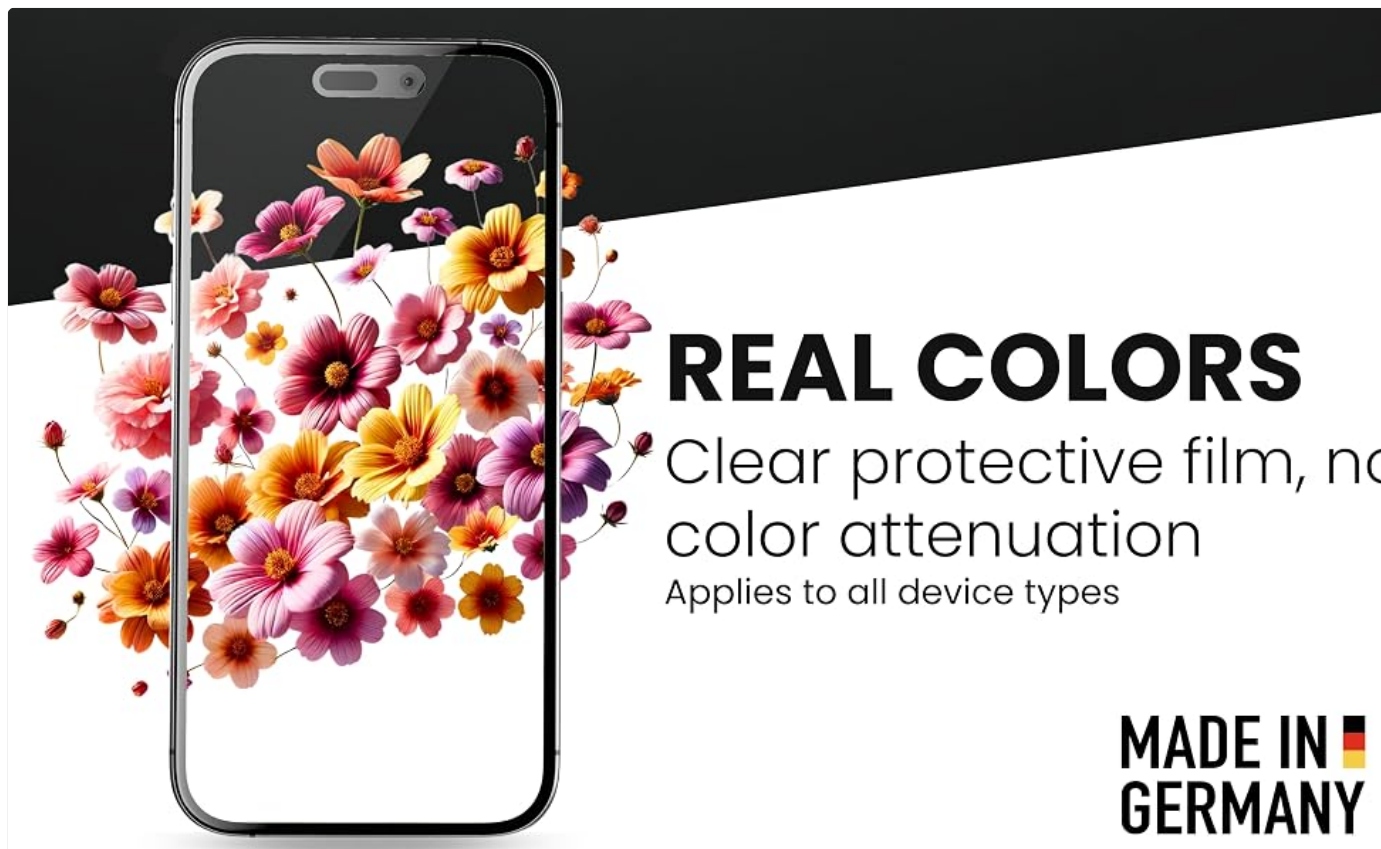

Made in  
Germany

Maximum  
Shatterproof

## 3. PACKAGE CONTENTS

Your Bruni Screen Protector package includes the following items:

- Bruni Display Protective Film (2X)
- Mounting Tool
- Microfiber Cleaning Cloth
- Mounting Instructions (detailed guide included in the package)

# Lieferumfang

**Displayschutzfolie**

**Montagewerkzeug**

**Mikrofaser Tuch**

**Montageanleitung**

## 4. SETUP AND INSTALLATION

For optimal results, perform the installation in a clean, dust-free environment. Refer to the detailed mounting instructions included in your package for visual guidance.

### Installation Steps:

- 1. Clean the Device Screen:** Use the provided microfiber cloth to thoroughly clean the Senbono V6 display. Ensure there are no dust particles, smudges, or fingerprints. For stubborn marks, a screen cleaning solution can be used, but ensure the screen is completely dry before proceeding.
- 2. Align the Protector:** Carefully peel back a small portion of the protective layer (usually marked "Step 1" or similar)

from one end of the screen protector. Align the exposed edge of the protector with the corresponding edge of your Senbono V6 display. Pay close attention to cutouts for cameras or sensors.

3. **Apply Gradually:** Slowly peel off the rest of the protective layer while simultaneously applying the screen protector to the display. Use the provided mounting tool (squeegee) to gently push out any air bubbles towards the edges as you go. Work from one end to the other.
4. **Remove Remaining Bubbles:** If any small bubbles remain, gently push them towards the nearest edge using the squeegee. For persistent bubbles, you may carefully lift a corner of the protector slightly and reapply, pushing the bubble out.
5. **Final Polish:** Once the protector is fully applied and free of bubbles, gently wipe the surface with the microfiber cloth to remove any smudges from the installation process.

*Remember: The protector is designed to be slightly smaller than the curved display of the Senbono V6 to ensure proper adhesion and prevent lifting.*

## 5. OPERATING AND USAGE

Once installed, the Bruni Screen Protector operates seamlessly with your Senbono V6 device. It is designed to provide an unadulterated display of screen contents and ensure no impairment of touch screen usability.

- **Touch Sensitivity:** The film maintains the original touch sensitivity of your device, allowing for smooth and responsive interactions.
- **Visual Clarity:** The highly transparent material ensures crystal-clear viewing without affecting color reproduction or brightness.
- **Protection:** The film provides a protective barrier against scratches, scuffs, and minor impacts from daily use.

## 6. MAINTENANCE

To keep your Bruni Screen Protector in optimal condition and ensure maximum clarity, follow these simple maintenance guidelines:

- **Regular Cleaning:** Gently wipe the screen protector with a clean, soft, lint-free cloth, such as the microfiber cloth provided.
- **Stubborn Smudges:** For more persistent smudges or fingerprints, slightly dampen the microfiber cloth with water or a screen-safe cleaning solution. Avoid using harsh chemicals, abrasive materials, or alcohol-based cleaners, as these can damage the film.
- **Avoid Sharp Objects:** While the protector is scratch-resistant, avoid direct contact with sharp objects like keys or knives to prolong its lifespan.

## 7. TROUBLESHOOTING

If you encounter any issues during or after the installation of your screen protector, refer to the following common problems and their solutions:

| Problem                               | Possible Cause / Solution                                                                                                                                                                                                                         |
|---------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Bubbles after installation            | Small air bubbles are common immediately after application. Use the squeegee to push them towards the nearest edge. For larger bubbles, carefully lift the nearest edge of the protector and reapply slowly, pushing the air out.                 |
| Dust particles trapped under the film | This usually occurs if the screen was not perfectly clean before application. Carefully lift the nearest edge of the protector, use a dust-absorber sticker (if provided in your kit) or a piece of tape to lift the dust particle, then reapply. |

| Problem                         | Possible Cause / Solution                                                                                                                                                                                                                       |
|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Protector not adhering at edges | Ensure the screen is clean and free of oils. For curved displays like the Senbono V6, the protector is designed to be slightly smaller to prevent lifting. If the issue persists, ensure proper alignment and firm pressure during application. |
| Reduced touch sensitivity       | This is rare with Bruni protectors. Ensure the protector is applied smoothly without large air pockets. If the issue persists, verify the protector is correctly aligned and not interfering with sensors.                                      |

## 8. SPECIFICATIONS
