## SETUP & INSTALLATION

Follow these steps for proper installation:

- 1. Prepare the Installation Area:** Turn off the water supply at the main shut-off valves. Clear the area under the sink.
- 2. Install Deck Plate (Optional):** If using the optional deck plate for a 3-hole installation, place it over the sink holes.
- 3. Mount the Faucet:** Insert the faucet body through the center hole (or deck plate). Secure it from underneath the sink using the provided mounting hardware. Ensure the faucet is oriented correctly.
- 4. Connect Water Supply Lines:** Attach the hot and cold water supply lines from the faucet to your home's water supply. Hand-tighten first, then use a wrench for a quarter turn. Do not overtighten.
- 5. Connect Sprayer Hose:** Attach the pull-down sprayer hose to the designated connection point under the faucet.
- 6. Install Weight:** Attach the hose weight to the pull-down hose at the marked location to ensure proper retraction.
- 7. Test for Leaks:** Turn on the water supply and check all connections for leaks. Operate the faucet to ensure

proper water flow and temperature control.

## OPERATING INSTRUCTIONS

### 1. Water Flow and Temperature Control

The single handle controls both water flow and temperature:

- **Turn On/Off:** Lift the handle upwards to turn on the water. Push it downwards to turn off.
- **Adjust Temperature:** Move the handle to the left for hot water and to the right for cold water.
- **Adjust Flow:** The further the handle is lifted, the greater the water flow.

### 2. Pull-Down Sprayer Function

The integrated pull-down sprayer offers enhanced versatility:

- **Extend Sprayer:** Gently pull the sprayer head downwards from the spout. The flexible hose allows for extended reach.
- **Switch Spray Modes:** Use the button on the sprayer head to toggle between a steady stream and a powerful spray.
- **MagnaTite® Docking:** When finished, guide the sprayer head back towards the spout. The powerful integrated magnet will securely dock it into place.

# MAINTENANCE

## Cleaning the Faucet

- Clean the faucet regularly with a soft, damp cloth and mild soap.
- Avoid abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the finish.
- For Touch-Clean® Spray Holes, simply wipe away mineral buildup with your finger.

## Preventing Mineral Buildup

In areas with hard water, mineral deposits can accumulate. Regular cleaning helps prevent this. For stubborn buildup, a solution of equal parts white vinegar and water can be applied with a soft cloth, then rinsed thoroughly.

# TROUBLESHOOTING

Problem	Possible Cause	Solution
Low Water Flow	Aerator clogged with debris or mineral buildup.	Remove and clean the aerator.
Leaking from Spout	Worn O-rings or seals in the cartridge.	Replace the faucet cartridge. Refer to Delta's website for replacement parts.
Sprayer Does Not Retract Fully	Hose weight is dislodged or obstructed.	Check the position of the hose weight and ensure the hose path is clear.
Water Temperature Issues	Supply lines are reversed or cartridge is faulty.	Verify hot and cold supply line connections. If correct, consider replacing the cartridge.

# WARRANTY & SUPPORT
