› ChunHee Smart Dog Door Bells User Manual - Model CB09

ChunHee CB09

ChunHee Smart Dog Door Bells User Manual

Model: CB09

INTRODUCTION

Thank you for choosing the ChunHee Smart Dog Door Bells. This system is designed to facilitate communication between you and your dog, enabling them to signal when they need to go outside for potty breaks or to come back inside. By using this manual, you will learn how to set up, operate, and maintain your dog doorbell system effectively.

Image: The ChunHee Smart Dog Door Bells system, featuring two white receivers with blue LED rings and three black dog buttons with a yellow dog icon. A beagle is shown pressing one of the buttons.

PRODUCT OVERVIEW

Components

- **Receiver(s):** Plugs into a standard wall outlet, emits sound and light signals.
- **Dog Button(s) (Transmitter):** Battery-powered, touch-sensitive, for dog interaction.
- **Mounting Accessories:** Reusable Velcro adhesive for installation.
- **User Manual:** This guide.

Key Features

- **Customized Ringtones:** 32 selectable sounds and voice commands (e.g., "outside," "potty," "hungry").
- **Adjustable Volume:** 5 levels, ranging from 0 to 111 decibels.
- **Touch Sensitive:** Large, responsive touch area suitable for all dog sizes.

- **Long Battery Life:** Up to 4 years for the dog button.
- **Easy Installation:** Wireless, plug-and-play design with adhesive mounting.
- **Weatherproof:** IP55 rating, suitable for outdoor use in various conditions (-4°F to 140°F).

Help dogs learn to use the dog doorbell faster

Image: The ChunHee receiver plugged into a wall socket, illustrating its "Plug and Play" nature with features like 32 chimes, LED indicator, memory function, and 0-110dB volume.

2. Dog Button (Transmitter) Installation

1. Choose a suitable location for the dog button, such as near the door your dog uses to go outside. Ensure it's at a height easily accessible by your dog's paw or nose.
2. Clean the surface where you intend to mount the button.
3. Peel off the backing from the reusable Velcro adhesive.
4. Attach the adhesive to the back of the dog button, ensuring not to cover the screw holes if present.
5. Press the dog button firmly onto the chosen surface (door, wall, or even on the floor).

Easy to install

using the adhesive patch

Note: Do not cover the screws

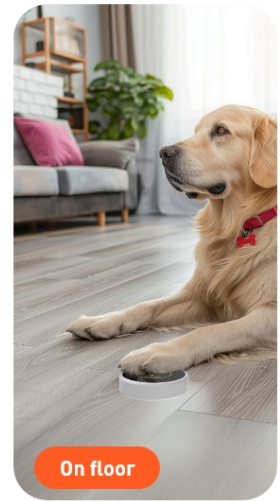

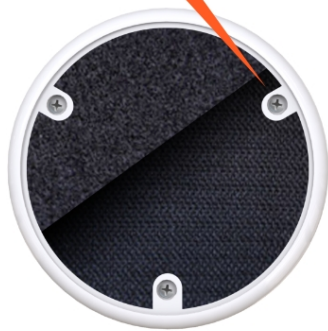

Image: Examples of easy installation for the dog button using an adhesive patch, demonstrating placement on a door, glass, and floor. A note advises not to cover the screws.

3. Pairing the Button with the Receiver

If your button and receiver are not already paired, or if you wish to add more buttons, follow these steps:

1. Plug the receiver into a socket.
2. Press the "Forward" or "Backward" button on the receiver to select your desired melody.
3. Press and hold the "Volume" button on the receiver for approximately 3 seconds until it makes a "Ding" sound and the receiver indicator flashes.
4. Within 8 seconds, touch the dog button (transmitter). The receiver will make a "Ding Ding" sound, and its indicator will flash, confirming successful pairing.

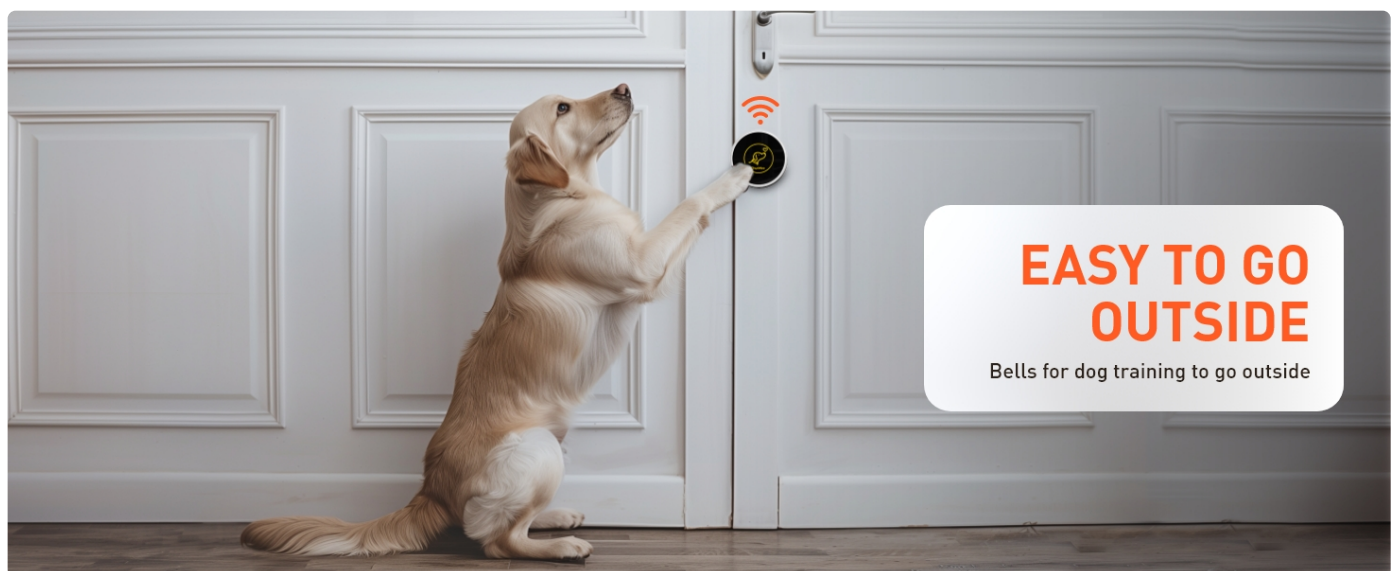

Image: A step-by-step guide illustrating how to pair the dog button with the receiver. It shows plugging in the receiver, selecting a melody, holding the volume button, and then touching the transmitter.

OPERATING INSTRUCTIONS

Adjusting Ringtones and Volume

- **Changing Ringtones:** Use the "Forward" and "Backward" buttons on the receiver to cycle through the 32 available melodies and voice commands.

- **Adjusting Volume:** Press the "Volume" button on the receiver to select one of the 5 volume levels.

How Your Dog Uses the System

Once trained, your dog will simply touch the large, sensitive area of the dog button with their paw or nose. This action sends a wireless signal to the receiver, which then plays the selected chime or voice command and flashes its LED indicator, alerting you to your dog's request.

Image: A corgi observing the dog button, emphasizing its sensitive touch and the yellow triggering area, which is roughly the size of a finger joint.

TRAINING GUIDE

The ChunHee Smart Dog Door Bells system includes a training guide to help your dog quickly learn to use the doorbell. Consistent training is key to success.

Basic Training Steps:

1. **Introduce the Button:** Place the button near the door. Encourage your dog to touch it with their paw or nose. You can use a treat to lure them.
2. **Associate with Going Outside:** Each time your dog touches the button, immediately open the door and take them outside, even if it's just for a moment. Praise and reward them.
3. **Consistency:** Repeat this process consistently. Every time your dog needs to go out, guide them to the button.
4. **Coming Back In:** You can also train your dog to ring the bell when they want to come back inside.

Image: A person assisting a white dog in pressing the ChunHee dog button, with a user manual titled "ChunHee Dog Door bells" in the foreground, emphasizing that training guidance is provided.

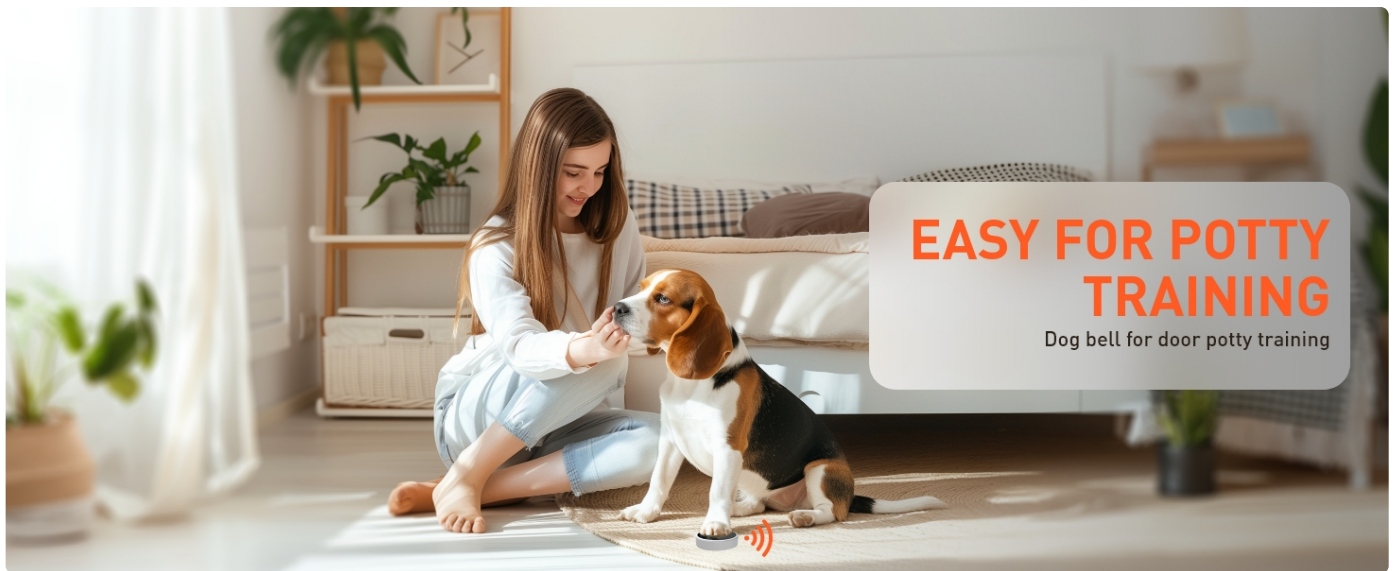

Image: A beagle sitting calmly next to a ChunHee dog button placed on the floor, illustrating its use for potty training.

Image: A Golden Retriever standing on its hind legs, pressing the ChunHee dog button mounted on a door, demonstrating how dogs can easily signal to go outside.

MAINTENANCE

Battery Replacement

The dog button uses a CR2032 battery, which typically lasts for 2-4 years. When the button's performance declines or it stops responding, it's time to replace the battery.

1. Carefully open the back cover of the dog button.
2. Remove the old CR2032 battery.
3. Insert a new CR2032 battery with the positive (+) side facing up.
4. Close the back cover securely.

How to add the button to the receiver

STEP1

Plug the receiver into a socket.

STEP2

Press the "Forward" or "Backward" button on the receiver to select your favorite melody.

STEP3

Press and hold the "Volume" button on the receiver for 5s, until it makes a "Ding" sound and the receiver indicator flashes.

STEP4

Touch the transmitter quickly within 8s after step3, the receiver makes a "Ding-Ding" sound, and the indicator flashes.

Image: A visual comparison highlighting the ChunHee dog button's use of a long-lasting CR2032 battery (2-3 years) against other brands that require more frequent changes of 12V 23A batteries.

Cleaning

Wipe the surfaces of the receiver and dog button with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners. Ensure the dog button is dry before re-mounting, especially if used outdoors.

Weather Resistance

The dog button is IP55 weatherproof, designed to withstand rain and varying temperatures from -4°F to 140°F. However, for optimal longevity, avoid prolonged exposure to extreme weather conditions.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Button not ringing receiver	- Low or dead battery in the dog button. - Button and receiver are not paired. - Obstruction or distance issues.	- Replace the CR2032 battery in the dog button. - Re-pair the button and receiver (refer to "Pairing the Button with the Receiver" section). - Ensure the button is within range of the receiver and there are no major metal obstructions.

Problem	Possible Cause	Solution
Receiver "ghost rings" or rings continuously	- Interference from other wireless devices. - Faulty button or receiver.	- Try moving the receiver to a different outlet or location away from other electronics. - Re-pair the button and receiver. If the issue persists, contact customer support.
Sound is too low or too loud	Volume setting needs adjustment.	Press the "Volume" button on the receiver to cycle through the 5 volume levels.
