OLEVS G2900

OLEVS G2900 Men's Chronograph Quartz Watch Instruction Manual

Model: G2900

INTRODUCTION

This instruction manual provides comprehensive guidance for the proper use and care of your OLEVS G2900 Men's Chronograph Quartz Watch. Please read this manual thoroughly to ensure optimal performance and longevity of your timepiece.

PRODUCT OVERVIEW

The OLEVS G2900 is a sophisticated men's chronograph quartz watch featuring a durable stainless steel construction, a high-hardness glass mirror, and a multi-functional dial including a chronograph and moon phase display.

SETUP

1. Adjusting Time and Date

To set the time and date on your OLEVS G2900 watch:

1. **Pull out the crown:** Gently pull the crown (middle button on the right side of the watch) to the second position.
2. **Set the time:** Rotate the crown to adjust the hour and minute hands to the correct time. Note that the moon phase display will change as the time turns, indicating AM/PM.
3. **Push in the crown:** Once the time is set, push the crown back into its original position to start the watch movement.

Figure 2: Watch Crown and Button Functions.

2. Adjusting the Bracelet

The stainless steel bracelet can be adjusted to fit your wrist. An adjustment tool is typically provided with the watch. If you are unfamiliar with this process, it is recommended to seek assistance from a professional jeweler to avoid damage to the bracelet or watch.

OPERATING THE WATCH

1. Chronograph Function

The chronograph function allows for precise timing of events:

- **Start/Pause:** Press the top push button (located above the crown) to start the chronograph. Press it again to pause.
- **Reset:** While the chronograph is paused, press the bottom push button (located below the crown) to reset the chronograph hands to zero.

2. Moon Phase Display

The moon phase display automatically advances with the time, indicating the current phase of the moon over a 24-hour cycle. This is an aesthetic feature and does not require manual adjustment.

Figure 3: Dial Features including Chronograph and Moon Phase.

3. Luminous Display

The watch hands and markers feature a luminous coating. For optimal glow in dark environments, expose the watch to a light source for a period of time to allow the luminous material to absorb light energy.

MAINTENANCE

1. Cleaning

Regularly wipe your watch with a soft, dry cloth to remove dust and smudges. For the stainless steel bracelet, a slightly damp cloth can be used, followed by immediate drying. Avoid using harsh chemicals or abrasive materials.

2. Water Resistance

Your OLEVS G2900 watch is water resistant to 3ATM (30 meters / 100 feet). This rating means it is suitable for daily use, such as splashes, rain, or brief immersion in water. **It is not suitable for bathing, showering, swimming, diving, or any water-related work where it would be submerged for extended periods or exposed to high-pressure water.** Ensure the crown is fully pushed in before any contact with water.

Figure 4: Water Resistance Illustration.

3. Battery Replacement

As a quartz watch, the OLEVS G2900 is powered by a battery. The battery life typically ranges from 2 to 3 years. When the watch stops running, it indicates the battery needs replacement. It is recommended to have the battery replaced by a qualified watch technician to ensure proper sealing and maintain water resistance.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch not running	Depleted battery; Crown not pushed in.	Replace battery (professional service recommended); Ensure crown is fully pushed in.
Incorrect time/date	Time/date not set correctly; Crown accidentally pulled out.	Refer to "Adjusting Time and Date" section to reset; Ensure crown is fully pushed in.
Chronograph not resetting to zero	Chronograph not paused before resetting.	Ensure chronograph is paused (top button) before pressing the reset button (bottom button).
Condensation under crystal	Exposure to extreme temperature changes or water ingress.	Seek professional service immediately to prevent internal damage.

SPECIFICATIONS

Model: G2900

Movement: Quartz

Case Diameter: 41 mm (1.61 inches)

Case Thickness: 11 mm (0.43 inches)

Bracelet Material: Stainless Steel

Bracelet Length: 210 mm (8.26 inches)

Bracelet Width: 20 mm (0.78 inches)

Weight: 126 g (4.4 oz)

Water Resistance: 3ATM (30 meters / 100 feet)

Crystal: High hardness coated mirror glass

Functions: Time, Chronograph (60-minute dial), Moon Phase, Luminous Display
