4. IMPORTANT NOTES AND PRECAUTIONS

Please read the following precautions carefully before attempting installation:

- **Professional Installation Recommended:** Highly recommend professional installation. If you are not experienced in phone repair, seek assistance from a qualified technician.
- **Pre-Installation Testing:** Always test the received screen assembly before full installation. Do not remove protective films or tags until testing is complete and successful.
- **Handle with Care:** The LCD is fragile. Avoid pressing the LCD hard, as it is easy to damage.
- **Flex Cable Caution:** Do not pull the flex cable too hard or bend it excessively, as this can cause damage to the display or touch functionality.
- **Power Off Device:** Ensure your phone is completely powered off and the battery cable is disconnected before assembling or disassembling any components.
- **Cleanliness:** Clean the flex cable of the new screen and the slot of the motherboard thoroughly before connecting. Ensure no debris or visible dust is on the connectors.
- **Online Resources:** Search for suitable repair videos on platforms like YouTube for visual guidance before beginning the installation process.
- **Do Not Force:** If you encounter any resistance or difficulty during installation, do not force

components. Re-evaluate your steps or seek professional help.

5. PRE-INSTALLATION TESTING STEPS

It is crucial to test the new screen assembly before fully installing it into the phone frame. This ensures the screen is functional and prevents issues after a complete assembly.

1. **Clean Connections:** Carefully clean the flex cable of the new screen and the corresponding slot on the phone's motherboard.
2. **Connect Screen:** Gently and securely connect the new screen's flex cable to the motherboard. Do not apply excessive force.
3. **Battery Check:** Ensure the phone's battery is fully charged and that the motherboard itself is not damaged.
4. **Power On & Test:** Temporarily power on the phone. Test the display for any abnormalities (dead pixels, lines, discoloration) and thoroughly test the touch functionality across the entire screen.
5. **Power Off:** If the test is successful, power off the phone and disconnect the battery before proceeding with the full installation.

6. INSTALLATION GUIDE

The installation of an LCD screen assembly requires careful handling and attention to detail. It is highly recommended to watch a detailed video tutorial specific to the Oukitel C53 model before attempting this repair.

General Steps (Consult Video for Details):

1. **Disassemble Phone:** Carefully open the phone's back cover and disconnect the battery.
2. **Remove Old Screen:** Gently remove the damaged screen assembly from the phone frame. This may involve heating the edges to loosen adhesive.
3. **Clean Frame:** Clean any old adhesive residue from the phone frame.
4. **Install New Screen:** Connect the new screen's flex cable to the motherboard (as done in pre-installation testing).
5. **Secure Screen:** Carefully place the new screen assembly into the phone frame, ensuring it sits flush. Apply new adhesive if necessary.
6. **Reassemble Phone:** Reconnect the battery, and reassemble the phone's components and back cover.
