Juboos 412L

Juboos Kids Analog Watch Model 412L Instruction Manual

Comprehensive instruction manual for the Juboos Kids Analog Watch Model 412L, covering setup, operation, maintenance, and specifications for children aged 4-15.

1. PRODUCT OVERVIEW

The Juboos Kids Analog Watch Model 412L is designed for children aged 4-15, featuring an easy-to-read dial and a durable, waterproof construction. Its thoughtful design includes a removable dial and a washable silicone strap for convenience and longevity.

2. SETUP

2.1. Setting the Time

1. **Detach the Dial:** Gently remove the watch dial from the silicone bracelet.
2. **Pull Out the Crown:** Locate the small knob (crown) on the side of the dial and gently pull it outwards.
3. **Adjust the Time:** Turn the crown counter-clockwise to move the hands and set the exact time.
4. **Push In the Crown:** Once the time is set, push the crown back into its original position to start the watch movement.
5. **Attach the Dial:** Carefully place the dial back into the silicone bracelet, ensuring it is securely fitted.

Video: Demonstrates the steps to detach the dial, set the time using the crown, and reattach the dial to the bracelet.

Image: A visual guide illustrating the four steps for adjusting the watch time: removing the dial, pulling out the knob, turning the knob to set the time, and mounting the watch face back.

3. OPERATING INSTRUCTIONS

3.1. Reading the Time

The watch features a clear analog dial designed to assist children in learning to tell time. It includes distinct hour, minute, and second hands, along with 12-hour numerals and a 60-minute scale for easy readability.

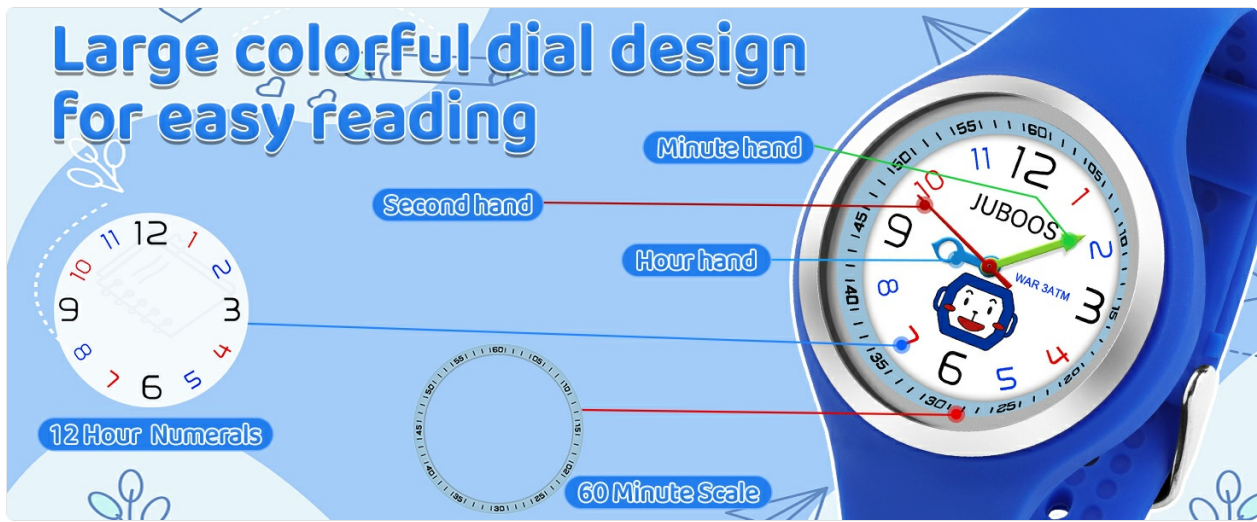

Image: An illustration of the watch dial, pointing out the minute hand, second hand, hour hand, 12-hour numerals, and 60-minute scale for easy time reading.

3.2. Water Resistance

The Juboos Kids Analog Watch is 30M/98FT water resistant, suitable for daily activities such as washing hands, face, and exposure to rain. It is important to note that the watch is not designed for swimming or diving, and the crown should not be operated underwater.

Video: Demonstrates the watch being exposed to running water from a tap, highlighting its 3ATM water resistance for daily needs.

Image: A collage showing children washing hands, playing in a pool, and being sprayed with water, emphasizing the watch's 30M/98FT water resistance for various daily activities.

4. MAINTENANCE

4.1. Cleaning the Strap

The silicone strap is designed to be washable. For cleaning, detach the watch dial from the strap. Wash the silicone strap with mild soap and water, then rinse thoroughly and allow it to air dry completely before reattaching the dial.

Video: Demonstrates the process of detaching the watch dial from the silicone strap, highlighting the washable nature of the strap.

4.2. General Care

- Avoid exposing the watch to extreme temperatures or direct sunlight for prolonged periods.
- Clean the watch dial with a soft, dry cloth.
- Store the watch in a safe place when not in use to prevent scratches or damage.

5. TROUBLESHOOTING

5.1. Watch Not Keeping Time

- Ensure the crown is fully pushed in after setting the time. If it is pulled out, the watch will not run.
- If the watch still does not keep accurate time, the battery may need replacement. Consult a professional watch repair service for battery replacement.

5.2. Water Inside the Watch

- While the watch is water-resistant, it is not waterproof for all activities. If water enters the watch, immediately take it to a professional watch repair service. Do not attempt to open the watch yourself.

6. SPECIFICATIONS

Feature	Detail
