6. Maintenance

To ensure the longevity and optimal performance of your ULTIMEA Apollo S40 sound bar, follow these general maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the surface of the sound bar. Avoid using liquid cleaners, aerosols, or abrasive solvents, as they may damage the finish or internal components.
- **Placement:** Place the sound bar on a stable, flat surface or mount it securely on a wall. Ensure adequate ventilation around the unit to prevent overheating. Avoid placing it near heat sources or in direct sunlight.
- **Storage:** If storing the sound bar for an extended period, disconnect it from the power source and store it in a cool, dry place, away from dust and moisture.
- **Handling:** Handle the sound bar carefully, especially when detaching or reattaching the sections. Avoid dropping or subjecting it to strong impacts.

7. Troubleshooting

If you encounter issues with your ULTIMEA Apollo S40 sound bar, refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
No Sound	Incorrect input source selected. Cables not securely connected. TV audio output settings incorrect. Sound bar not powered on.	Ensure the correct input (HDMI ARC, Optical, AUX, Bluetooth) is selected on the sound bar. Check all audio cables (HDMI, Optical, AUX) are firmly connected to both the sound bar and the TV/device. Verify your TV's audio output is set to external speakers (e.g., PCM, Bitstream, or Auto for Optical/HDMI ARC). Ensure the sound bar is powered on and the power adapter is connected.
Bluetooth Pairing Issues	Sound bar not in pairing mode. Device too far from sound bar. Interference from other devices.	Ensure the sound bar is set to Bluetooth input and the indicator is flashing. Move your Bluetooth device closer to the sound bar (within 49 feet). Turn off other Bluetooth devices nearby that might be causing interference. Try unpairing and re-pairing the device.
Remote Control Not Working	Batteries are dead or incorrectly inserted. Obstruction between remote and sound bar.	Replace the batteries (2 x AAA, not included). Ensure they are inserted with correct polarity. Remove any obstructions between the remote and the sound bar's sensor. Point the remote directly at the sound bar.
Sound Distortion/Static	Poor cable connection. Source audio quality. Volume too high.	Check all cable connections for looseness or damage. Test with a different audio source to rule out source quality issues. Reduce the volume level.
