CooSpo HW9 USB Charger Cable

CooSpo HW9 Heart Rate Monitor Armband USB Charge Cable User Manual

1. Introduction

This manual provides instructions for the proper use and maintenance of your CooSpo HW9 Heart Rate Monitor Armband USB Charge Cable. This cable is specifically designed as a replacement charger for the CooSpo HW9 Heart Rate Monitor Armband. Please read these instructions carefully before use to ensure optimal performance and longevity of your product.

2. Setup and Connection

To charge your CooSpo HW9 Heart Rate Monitor Armband, follow these steps:

1. **Identify Charging Ports:** Locate the two magnetic charging pins on the back of your CooSpo HW9 Heart Rate Monitor Armband.
2. **Connect Cable to Armband:** Align the magnetic end of the USB charge cable with the charging pins on the armband. The magnets will help secure the connection. Ensure the pins are clean and free of debris for a proper connection.
3. **Connect to Power Source:** Plug the USB-A end of the charge cable into a standard USB power adapter (e.g., a wall charger, computer USB port, or power bank). The power source should provide 5 Volts.

Image 1: CooSpo HW9 Heart Rate Monitor Armband with the USB charging cable properly connected. The cable attaches to the side of the monitor unit.

Image 2: Detailed view of the magnetic charging interface. The two gold pins on the cable connect to the corresponding contacts on the back of the HW9 monitor.

3. Operating Instructions

Once the cable is connected to both the armband and a power source, the CooSpo HW9 Heart Rate Monitor Armband will begin charging. Refer to your HW9 armband's specific user manual for details on its charging indicator lights (e.g., LED color changes or blinking patterns) to confirm charging status and completion.

- Ensure the connection is stable throughout the charging process.
- Avoid disconnecting the cable abruptly during charging.
- Charging time may vary depending on the power source and the armband's battery level.

4. Maintenance

Proper care of your charge cable will extend its lifespan:

- **Cleaning:** Gently wipe the cable and its magnetic contacts with a dry, soft cloth to remove dust or debris. Do not use liquid cleaners.
- **Storage:** Store the cable in a cool, dry place away from direct sunlight and extreme temperatures. Avoid tightly coiling or bending the cable excessively, especially near the connectors.
- **Handling:** Always grasp the connector ends when plugging or unplugging the cable. Avoid pulling on the cable itself, as this can damage the internal wires.

5. Troubleshooting

If your CooSpo HW9 Heart Rate Monitor Armband is not charging:

- **Check Connections:** Ensure the magnetic end of the cable is securely attached to the armband and the USB-A end is fully inserted into the power source.
- **Verify Power Source:** Try plugging the USB-A end into a different USB port or power adapter to rule out a faulty power source.
- **Inspect Contacts:** Check the magnetic charging pins on both the cable and the armband for any dirt, corrosion, or damage. Clean gently if necessary.
- **Cable Damage:** Examine the entire length of the cable for any visible signs of damage, such as cuts, fraying, or severe bends. A damaged cable should be replaced.

6. Specifications

Feature	Detail
Product Type	Replacement USB Charge Cable
Compatibility	CooSpo HW9 Heart Rate Monitor Armband
Connector Type	Magnetic 4-Pin to USB-A
Maximum Voltage	5 Volts
Usage Environment	Indoor
Item Weight	Approximately 10 Grams (0.353 ounces)
