2. SETUP GUIDE

2.1 Connecting to PC (2.4GHz Wireless Mode)

1. Turn on the headset by pressing and holding the power button.
2. Set the headset to "2.4G" mode using the mode switch. The indicator light will flash white when not connected.
3. Plug the 2.4GHz USB transmitter into an available USB port on your PC. The transmitter light will flash blue.
4. Once connected successfully, the transmitter light will stay solid blue, and the headset light will stay solid white.

Your browser does not support the video tag.

Video: Step-by-step instructions for connecting the Gvyugke Captain 780 headset to a PC using 2.4GHz wireless mode.

2.2 Connecting to PC (Bluetooth Mode)

1. Turn on the headset by pressing and holding the power button.
2. Set the headset to "BT" (Bluetooth) mode using the mode switch. The indicator light will flash blue when not connected.
3. On your PC, open Settings and navigate to "Bluetooth & devices."
4. Click "Add device" and select "Bluetooth."
5. Select "Captain 780" from the list of available devices to connect. If not found, switch the headset to 2.4G mode and then back to BT mode.

Your browser does not support the video tag.

Video: Guide on how to connect the Gvyugke Captain 780 headset to a PC via Bluetooth.

2.3 Connecting to PS5 (Wired Mode)

1. Turn on the headset.
2. Plug the 3.5mm audio cable into the PS5 controller.
3. Plug the USB-C end of the cable into the headset.
4. **Note:** Lights will be off in wired mode, and the headset mute button will not work. Mute via your PS5 device if needed.

Your browser does not support the video tag.

2.4 Connecting to PS5 (2.4GHz Wireless Mode)

1. Turn on the headset.
2. Set the headset to "2.4G" mode. The headset light will flash white when not connected.
3. Connect the USB-C transmitter (or directly via USB to the back of the PS5). The indicator light will flash blue.
4. After a successful connection, the light stays solid blue. If it won't connect, switch to Bluetooth mode first, then back to 2.4G mode.

Your browser does not support the video tag.

3.2 Audio Settings on PC

After connecting your headset to a PC, ensure the audio settings are correctly configured:

1. Open your computer settings and click "Bluetooth & devices."
2. Click "System" then select "Sound."
3. Ensure "Output" is set to "Captain 780" and the volume is adjusted as needed.
4. Ensure "Input" is set to "Captain 780" and the volume is adjusted as needed.
5. If game volume is low, adjust it in the "Volume mixer" under "Apps."

Your browser does not support the video tag.

3.3 Audio Settings on PS5

To optimize your audio experience on PS5:

1. Open "Settings" on your PS5.
2. Click "Sound."
3. Ensure the PS5 is using "USB Headset (Captain 780)" for both input and output.

4. Check the microphone sound level and adjust as necessary.
5. Adjust the headphone volume as needed.

Your browser does not support the video tag.

4. MAINTENANCE

To ensure the longevity and optimal performance of your Gvyugke Captain 780 Wireless Gaming Headset, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the headset. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store the headset in a cool, dry place away from direct sunlight and extreme temperatures. The foldable design allows for compact storage.
- **Battery Care:** For optimal battery life, avoid fully discharging the headset frequently. Charge it regularly, especially if not used for extended periods.
- **Cable Management:** Keep cables untangled and avoid sharp bends to prevent damage.

5. TROUBLESHOOTING

5.1 Microphone Echo

If you experience an echo in the microphone, it may be due to the monitoring function being enabled. To resolve this:

1. Access your sound settings on your PC (as shown in Section 3.2).
2. Navigate to the recording devices settings.
3. Select the Captain 780 microphone, go to its properties, and check the "Listen" tab.
4. Ensure the "Listen to this device" option is unchecked to turn off the monitoring function.

Your browser does not support the video tag.

Video: A guide to fixing microphone echo issues by adjusting monitoring settings on your PC.

5.2 Connectivity Issues

- **Headset not connecting:** Ensure the headset is fully charged and the correct mode (2.4G or BT) is selected. Try toggling the mode switch off and on.
- **Intermittent connection:** Ensure the transmitter (for 2.4G) or your device (for Bluetooth) is within the effective range (10 meters). Avoid obstacles that may interfere with the signal.
