Maintenance

To ensure the longevity and appearance of your MAHANCRIS Kitchen Island, follow these maintenance guidelines:

- **Cleaning:** Wipe the surfaces with a dry, soft cloth. For stubborn marks, a slightly damp cloth followed by a dry cloth can be used. Avoid abrasive cleaners or harsh chemicals, as these can damage the finish.
- **Spills:** Clean up spills immediately to prevent staining or damage to the engineered wood.
- **Caster Care:** Periodically check the casters for any debris or hair that might impede their movement. Clean as necessary.
- **Hardware:** Occasionally check all screws and fasteners to ensure they remain tight. Retighten if necessary to maintain stability.
- **Power Strip:** Keep the power strip clean and dry. Do not expose it to liquids.

Troubleshooting

If you encounter any issues with your MAHANCRIS Kitchen Island, consider the following common solutions:

- **Island is unstable/wobbly:** Check all assembly screws and ensure they are fully tightened. Verify that the island is on a flat, even surface.
- **Drawer does not slide smoothly:** Ensure the drawer slides are correctly installed and free of obstructions. Check for any loose screws on the drawer or its runners.
- **Casters are not rolling freely:** Inspect the casters for trapped debris (e.g., hair, lint). Clean them thoroughly. Ensure the caster locks are disengaged if you intend to move the island.
- **Power outlets are not working:** Ensure the island's main power cord is securely plugged into a functional wall outlet. Check if the wall outlet itself is working by plugging in another device. If the power strip has a reset button, try pressing it.
- **Missing parts during assembly:** Refer to the "Package Contents" section. If parts are genuinely missing, contact MAHANCRIS customer support.

If these steps do not resolve your issue, please contact MAHANCRIS customer support for further assistance.
