Troubleshooting

Problem	Possible Cause	Solution
Cushions appear flat or wrinkled	Vacuum packaging; insufficient expansion time.	Firmly pat cushions and allow up to 72 hours for full expansion.
Sofa feels too low to the ground	Standard leg height (3.15 inches).	Consider replacing with taller furniture legs if desired (not included).
Sofa sections slide on hard floors	Lack of friction between legs and flooring.	Place rubber pads or non-slip grippers under the sofa legs.
Backrest cushions feel too thin or lack support	Initial expansion or personal preference.	Ensure cushions are fully fluffed. Additional throw pillows can be used for extra lumbar support.
