If you encounter any issues with your DTK Washer Dryer Countertop, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution

Items slide off the countertop during washer/dryer operation.	Anti-slip strips not properly applied or worn out. Excessive vibration from machines.	Check that the 3M anti-slip strips are firmly attached to the underside of the countertop and making good contact with the machines. Replace strips if worn. Ensure machines are level and balanced to minimize vibration.

Problem	Possible Cause	Solution
Surface appears stained or discolored.	Spills left for extended periods or use of harsh cleaners.	Clean spills immediately with a damp cloth and mild soap. Avoid using abrasive or chemical cleaners. For stubborn stains, a gentle, non-abrasive household cleaner may be used sparingly, followed by thorough rinsing and drying.
Difficulty with assembly.	Incorrect part identification or steps missed.	Review the 'Package Contents' and 'Setup and Assembly' sections carefully. Ensure each step is followed in order. If issues persist, contact customer support.
