## SETUP

### Initial Charging

Before first use, it is recommended to fully charge your INIU 3-in-1 Power Bank. Simply unfold the AC plug and insert it into a standard wall outlet. The digital display will show the charging progress. A full charge typically takes approximately 2 hours.

### Connecting Devices

The power bank offers multiple ways to connect your devices:

- **Built-in USB-C Cable:** Pull out the integrated USB-C cable and connect it directly to your USB-C compatible device.
- **USB-C Port:** Use your own USB-C to USB-C cable to connect devices to the dedicated USB-C output port.
- **USB-A Port:** Use your own USB-A to compatible cable to connect devices to the USB-A output port.

## OPERATING INSTRUCTIONS

---

### Using as a Power Bank

When not connected to a wall outlet, the device functions as a portable power bank. Simply connect your device using the built-in USB-C cable, the USB-C port, or the USB-A port. The power bank will automatically begin charging your connected device. The digital display will show the remaining battery percentage.

### Using as a Wall Charger

Unfold the AC plug and insert the power bank into a wall outlet. Connect your devices to the available ports. The power bank will prioritize charging your connected devices directly from the wall power. Once your devices are fully charged, the power bank will automatically begin recharging its internal battery.

### LED Indicator Lights

The digital display on the power bank indicates the current battery percentage. During charging or discharging, the percentage will update in real-time.

## MAINTENANCE

---

### Care and Cleaning

- Keep the power bank dry. Do not expose it to moisture or liquids.
- Clean the surface with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials.
- Ensure the AC plug and charging ports are free from dust and debris.

### Storage

- Store the power bank in a cool, dry place away from direct sunlight and extreme temperatures.
- For long-term storage, it is recommended to charge the power bank to approximately 50-70% every three months to maintain battery health.

## TROUBLESHOOTING

---

Problem	Possible Cause	Solution
Power bank not charging	AC plug not fully inserted; faulty wall outlet; damaged cable.	Ensure AC plug is fully inserted. Try a different wall outlet. Check if the built-in cable or external cables are damaged.
Device not charging from power bank	Power bank battery depleted; incorrect cable/port; device compatibility issue.	Recharge the power bank. Ensure you are using the correct cable and port for your device. Verify device compatibility with the power bank's output specifications.
Slow charging	Using non-fast charging cable; multiple devices charging simultaneously (total output limited); device not supporting fast charge.	Use a fast-charging compatible cable. Disconnect other devices to allow maximum power to a single device. Ensure your device supports 30W fast charging.

Problem	Possible Cause	Solution
Power bank gets hot during use	Normal operation during high power output; poor ventilation.	Some heat is normal during charging/discharging. Ensure adequate ventilation around the power bank. If it becomes excessively hot, disconnect and allow it to cool.

If problems persist, please refer to the warranty and support section for further assistance.
