DOBE FOMIS ELECTRONICS TP5-3532B

Dobe TP5-3532B Multifunctional Cooling Station User Manual

For PlayStation 5 and PS5 Slim Consoles

INTRODUCTION

The Dobe TP5-3532B is a versatile accessory designed to enhance your PlayStation 5 or PS5 Slim gaming experience. It functions as a vertical stand, a cooling station with high-speed fans, and a dual charging dock for PS5 controllers. Additionally, it features an RGB LED controller and storage slots for game cards and a media remote. This manual will guide you through the setup, operation, and maintenance of your new cooling station.

WHAT'S IN THE BOX

- 1 x Multifunctional Cooling Stand (Cooling Base)
- 1 x New PS5 Extension Support (Bracket for PS5 Slim)
- 1 x Retaining Screw
- 1 x Charging Cable (USB-C)

Image showing the components included in the package: the multifunctional cooling stand, the PS5 Slim extension support, a retaining screw, and a USB-C charging cable.

SETUP INSTRUCTIONS

1. **Unpack Components:** Carefully remove all items from the packaging.
2. **Connect Power:** Connect the provided USB-C charging cable to the USB-C Type Input port on the cooling station. Plug the other end into a suitable power source (e.g., a USB port on your PS5 console or a USB wall adapter).
3. **Install PS5 Console:**
 - **For PS5 Standard/Digital Edition:** Place your PS5 console directly onto the stand, aligning the console's base with the stand's slot. Secure it with the retaining screw from the bottom of the stand if desired.
 - **For PS5 Slim:** Attach the 'New PS5 Extension support' bracket to the top of the cooling stand first. Then, place your PS5 Slim console onto the stand with the bracket, ensuring it is stable.

OPERATING INSTRUCTIONS

Power On/Off

Press the **ON-OFF** button located on the front of the stand to power the unit on or off. The unit will automatically start in fast fan gear when powered on.

Cooling Fan Operation

The cooling station features two high-speed fans designed to improve air circulation and dissipate heat from your PS5 console.

- **Fan Gear Switch:** Press the fan gear switch button to cycle through fan speeds: Fast Gear → Medium Gear → Slow Gear → Off.
- **Fan Gear Indicators:** Blue indicator lights correspond to the fan speeds. The intensity of the blue light indicates the current speed: bright for fast, medium for medium, and dim for slow. The lights turn off when the fan is off.
- **White Light Icons:** Corresponding white light icons (fan blades) also indicate the fan speed: three blades for fast, two for medium, and one for slow. These icons turn off when the fan is off.

Controller Charging

The station can charge two original PS5 DualSense controllers simultaneously.

1. **Initiating Charge:** Insert a PS5 controller smoothly into the left or right charging deck. The corresponding controller icon on the display window will turn red, indicating charging is in progress.
2. **Charging Status Indicators:**
 - **Product Powered On, No Controller:** Controller icons on the display window are blue.
 - **Charging (Controller Not Connected to Console):** The controller's own indicator light will display an orange breathing effect.
 - **Charging (Controller Connected to Console):** The controller's own indicator light will be solid white. If charging during gameplay, the controller will light blue and white for an extended period.
 - **Charging Complete:** The controller icon on the display window will turn blue again. The controller's own indicator light will turn off.
3. **Battery Protection Function:** If a controller's charge level is 80% or higher and you unplug and then re-plug it, charging may not resume immediately due to the controller's built-in battery protection. Wait until the battery level drops below 80% for charging to continue.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to wipe down the cooling station. Do not use abrasive cleaners or solvents.

- **Dust Removal:** Periodically check the fan vents for dust accumulation. Use compressed air or a soft brush to gently clear any dust to ensure optimal airflow.
- **Storage:** When not in use for extended periods, store the cooling station in a cool, dry place away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Cooling fans not working.	No power; Fan switch off; Cable not connected properly.	Ensure power cable is securely connected. Press the ON-OFF button. Press the fan gear switch to select a speed.
Controllers not charging.	Controller not seated correctly; Battery protection active; Power issue.	Ensure controller is firmly seated in the charging dock. If battery is >80%, wait for it to drop. Check power connection to the stand.
Indicator lights not functioning.	Unit is off; Malfunction.	Ensure the unit is powered on. If problem persists, contact customer support.

SPECIFICATIONS

- **Model Number:** TP5-3532B
- **Product Dimensions:** 10.3 x 2.1 x 11.3 inches
- **Item Weight:** 2.4 pounds
- **Manufacturer:** Shenzhen Yuyuanxin Electronic Technology Co.,Lt
- **Date First Available:** October 23, 2024

WARRANTY AND SUPPORT

For warranty information or technical support, please refer to the contact details provided with your purchase or visit the official DOBE FOMIS ELECTRONICS website. Please retain your proof of purchase for any warranty claims.
