LUFTRUM C3500

LUFTRUM C3500 and C3500 WIFI Air Purifier Original Replacement Filter Set

Instruction Manual

INTRODUCTION

This manual provides essential instructions for the installation and maintenance of your LUFTRUM C3500 and C3500 WIFI Air Purifier Original Replacement Filter Set. This set includes one True HEPA Filter and one Activated Carbon Filter, designed to ensure optimal performance and air quality from your LUFTRUM C3500 series air purifier.

INSTALLATION AND SETUP

Follow these steps to correctly install the replacement filters in your LUFTRUM C3500 or C3500 WIFI Air Purifier. Ensure the air purifier is turned off and unplugged before beginning the installation process.

1. **Step 1: Open the Front Cover and Remove the Old Filter.** Gently pull open the front cover of your air purifier. Carefully remove the used filter set.
2. **Step 2: Remove Plastic Bag from New Filter.** Before installation, remove all plastic packaging from the new replacement filters. Failure to do so will prevent proper air filtration.
3. **Step 3: Insert the New Filter.** Place the new filter set into the air purifier. Ensure the high-efficiency particulate (HEPA) filter faces outward, towards the front cover.
4. **Step 4: Reset the Filter Indicator.** Close the front cover. Plug in and turn on the air purifier. Press and hold both the **speed** and **sleep** buttons simultaneously for 5 seconds to reset the filter life indicator.

Easy to Replace

Step 1

Open the front cover and **pull** the filter out

Step 2

Remove plastic bag from filter before installing

Step 3

Install the filters and ensure the **HEPA** filter faces out

Step 4

Press speed and sleep button together for **5 seconds** to reset

Image: A visual guide demonstrating the four steps for replacing the air purifier filters: opening the cover, removing plastic, inserting the new filter, and resetting the indicator.

OPERATING AND FILTER LIFESPAN

The LUFTRUM C3500 replacement filter set is designed for continuous, high-quality air purification. Each filter set provides an extended lifespan of approximately 6-9 months, depending on usage and air quality conditions. Regular replacement ensures optimal performance and a clean, healthy indoor environment.

The filter system consists of multiple layers:

- **Pre-Filter:** Captures larger particles such as dust, lint, and pet fur.
- **True H13 HEPA Filter:** Traps 99.97% of airborne particles as small as 0.3 microns, including pollen, dust mites, pet dander, and smoke particles.
- **Activated Carbon Filter:** Absorbs odors from cooking, pets, smoke, and volatile organic compounds (VOCs).

Extended Lifespan with Dual 3-Stage Filter

MAINTENANCE

To maintain the efficiency and longevity of your LUFTRUM air purifier, it is crucial to replace the filters regularly as indicated by the filter life indicator or every 6-9 months. Always use official LUFTRUM replacement filters to ensure compatibility, optimal performance, and to keep your product warranty valid.

LUFTRUM offers different filter types to suit various needs:

- **Original Filter:** Ideal for general dust, pollen, smoke, and bacteria filtration.
- **Pet Allergen Filter:** Specifically designed for pet allergens, pet odors, and cooking smells.

Choose the **Perfect Filter** for Your Lifestyle

Original Filter

Dust/Pollen/Smoke/Bacteria

Pet Allergen

Pet Allergens/Pet Odors/
Cooking Smells

Image: A visual comparison between the 'Original Filter' for general pollutants and the 'Pet Allergen' filter for specific pet-related issues and odors.

Using non-official or third-party filters may lead to:

- Poor fit and seal, reducing filtration effectiveness.
- Lower filtration performance.
- Shorter filter lifespan.
- Potential damage to the air purifier, invalidating its warranty.

The image is a comparison chart with two columns. The left column, titled 'Our Filters', has a blue background and features a woman relaxing on a couch with her hands behind her head, indicating comfort and good air quality. Below her is a close-up of a clean, black mesh filter with a green checkmark icon. The right column, titled '3rd Party Filter', has a grey background and features a man and a woman both holding tissues to their faces, suggesting allergies or poor air quality. Below them is a close-up of a dirty, dark filter with a red 'X' icon.

Our Filters	3rd Party Filter
😊 Perfect Fit&Seal	😞 Poor Fit
😊 High Performance	😞 Low Effectiveness
😊 Longer Lifespan	😞 Shorter Lifespan
😊 Warranty Valid	😞 Purifier May Break, Warranty Invalid

Image: A comparison chart highlighting the benefits of LUFTRUM official filters (Perfect Fit & Seal, High Performance, Longer Lifespan, Warranty Valid) against the drawbacks of 3rd party filters (Poor Fit, Low Effectiveness, Shorter Lifespan, Purifier May Break, Warranty Invalid).

TROUBLESHOOTING

If you encounter issues after replacing your filters, consider the following:

- **Air Purifier Not Filtering Effectively:** Ensure all plastic packaging was removed from the new filters before installation. Verify that the filters are correctly seated within the air purifier, with the HEPA side facing outward.
- **Filter Indicator Light Remains On:** If the filter replacement indicator light does not turn off after installation, repeat the filter reset procedure: press and hold both the **speed** and **sleep** buttons for 5 seconds.
- **Unusual Odors:** If new or unusual odors are present, ensure the activated carbon filter is correctly installed and that all packaging was removed. If the issue persists, the filter may be saturated and require earlier replacement, especially in environments with high levels of pollutants or odors.

SPECIFICATIONS

Feature	Detail
Brand	LUFTRUM
Model Number	C3500
Compatible Devices	LUFTRUM C3500 and C3500 WIFI Air Purifier
Filter Type	True HEPA (H13) and Activated Carbon
