6. TROUBLESHOOTING

If you encounter issues with your Redmi Note 14 5G, refer to the following common problems and their solutions:

Problem	Possible Cause / Solution
Device not turning on	Battery is drained. Charge the device for at least 30 minutes. If still unresponsive, perform a forced restart by holding the Power button for 10-15 seconds.
Slow performance / Freezing	Too many apps running in the background. Close unused apps. Clear cache. Restart the device. Check for system updates.
Camera issues (blurry photos, app crash)	Ensure camera lens is clean. Restart the camera app or the phone. Check for software updates, as camera performance can be improved via updates.
Battery draining quickly	High screen brightness, background app activity, or network issues. Adjust brightness, close background apps, disable unnecessary features (GPS, Bluetooth, Wi-Fi when not in use).
Connectivity problems (Wi-Fi, Bluetooth, Mobile Data)	Toggle Wi-Fi/Bluetooth/Mobile Data off and on. Restart the phone. Forget and reconnect to Wi-Fi networks. Check SIM card insertion.
Fingerprint sensor not working	Ensure your finger is clean and dry. Re-register your fingerprint. Ensure the screen protector (if any) does not interfere with the sensor.

For persistent issues, consider performing a factory reset (*Note: This will erase all data on your device. Back up important data before proceeding.*) or contacting Xiaomi customer support.
