3. SETUP

3.1. Device Connection

1. Connect the provided USB Type-C cable to the Type-C input port on the Nobsound DV-01 volume controller.
2. Plug the other end of the USB cable into an available USB port on your computer, laptop, smartphone, or tablet.
3. The device is plug-and-play and typically requires no additional driver installation for basic functionality.

DV-01 Volume Controller

With a Type-C input interface, is compatible with a wide range of devices including phones, computers, tablets, and audio players. One-touch mute function, allowing for immediate silence whenever necessary.

3.2. Placement and Stability

To ensure stability and prevent the device from sliding, apply the included non-slip mat or 3M double-sided adhesive to the bottom of the volume controller before placing it on your desktop.

Complete accessories for multiple scenarios use

Comes with 1 x non-slip mat to increase the friction between DV-01 and desktop and placed firmly, and with 2 x double-sided adhesive, convenient to stick to any place,

5. MAINTENANCE

- Keep the device clean by wiping it with a soft, dry cloth.
- Avoid exposing the device to excessive moisture or extreme temperatures.
- Do not attempt to disassemble the device, as this may void the warranty.

6. TROUBLESHOOTING

- **Device not recognized:** Ensure the USB cable is securely connected to both the controller and your device. Try a different USB port or cable.
- **Volume not adjusting:** Verify that the device is properly connected and recognized by your operating system. Check your system's audio settings to ensure the Nobsound DV-01 is selected as the output device.
- **Breathing light not working:** Ensure the device is powered on via the USB connection. If the light is off, press and hold the knob for a few seconds to cycle through light modes or turn it on.
