3. SETUP

3.1 Charging the Battery

1. Connect the camera to a power source using the provided Type-C cable.
2. The charging indicator light will be red while charging.
3. The light will turn off when the battery is fully charged.

3.2 Inserting the Micro SD Card

1. Locate the Micro SD card slot on the side of the camera.
2. Gently insert the provided 64GB Micro SD card into the slot until it clicks into place. Ensure the card is inserted in the correct orientation.

3.3 Powering On/Off

- To power on, press and hold the power button located on the side of the camera.
- To power off, press and hold the power button again.

4. OPERATING INSTRUCTIONS

4.1 Basic Controls

Familiarize yourself with the camera's buttons and their functions:

- **Power Button:** Turns the camera on/off.
- **Shutter Button:** Takes photos.
- **Video Button:** Starts/stops video recording.
- **W/T Buttons:** Controls digital zoom (W for wide, T for telephoto).
- **OK Button:** Confirms selections in the menu.
- **Menu Button:** Accesses camera settings and modes.
- **DISP Button:** Toggles display information on/off.
- **Directional Pad:** Navigates through menus and options.

4.3 Recording Videos

1. Power on the camera.
2. Press the Video Button once to start recording. A red 'REC' indicator will appear on the screen.
3. Press the Video Button again to stop recording.

4.4 Using Digital Zoom

The camera supports up to 18X digital zoom.

- While in photo or video mode, press the 'T' button to zoom in.
- Press the 'W' button to zoom out.

Figure 4: 18X Digital Zoom capability.

4.5 Selfie Mode and Front Mirror

The camera features a small mirror on the front, next to the lens, to assist with framing selfies.

1. Switch to photo mode.
2. Point the camera towards yourself, using the front mirror to compose your shot.
3. Press the Shutter Button to capture your selfie.

4.6 Advanced Features (Menu Options)

Press the **Menu** button to access various settings:

- **Photo Resolution:** Adjust photo quality (e.g., 64MP).
- **Timed Photo (Self-Timer):** Set a delay of 3s, 5s, 10s, or 20s before taking a photo.
- **Continuous Shooting:** Capture multiple photos in quick succession.
- **Color Effects/Filters:** Apply various creative filters (e.g., Vintage, Black/White).
- **LED Fill Light:** Activate the built-in LED light for improved lighting in dark environments.
- **Anti-Shake:** Digital image stabilization to reduce blur.

6. MAINTENANCE

- Keep the camera clean by wiping it with a soft, dry cloth.
- Avoid exposing the camera to extreme temperatures, dust, or moisture.
- Do not attempt to disassemble the camera, as this will void the warranty.
- Store the camera in its protective bag when not in use.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Camera does not power on	Low battery; Faulty battery/charger	Charge the battery fully; Try a different charging cable/adapter.
Poor image quality	Insufficient lighting; Dirty lens; Incorrect settings	Use LED fill light or better lighting; Clean the lens; Adjust photo resolution/settings.
Cannot transfer files	Loose cable connection; Incorrect mode selected	Ensure cables are securely connected; Select "Camera" mode for webcam or U-drive mode for transfer.
Memory card error	Card not inserted correctly; Corrupted card	Reinsert the Micro SD card; Try formatting the card (this will erase all data).
