## 5. OPERATION

The CAPHAUS L-Shaped Bookshelf is designed for storing and displaying various items. To ensure optimal performance and safety:

- **Load Distribution:** Distribute weight evenly across the shelves. Avoid concentrating heavy items on one side or on the very top shelf.
- **Weight Limits:** Adhere to the maximum load bearing capacity of 70 lbs per shelf and 350 lbs total for the unit.
- **Placement:** Position the bookshelf in a corner to maximize its stability and space-saving design. Ensure it is placed on a flat, stable surface.

## 6. MAINTENANCE

Proper care will extend the life and appearance of your CAPHAUS L-Shaped Bookshelf.

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners, as these can damage the finish. The wooden boards are waterproof and easy to clean.
- **Scratch Prevention:** While the boards are scratch-proof, avoid dragging sharp or heavy objects directly across the surface to maintain its appearance.
- **Regular Checks:** Periodically check all screws and fasteners to ensure they remain tight. Re-tighten if necessary.
- **Environmental Conditions:** Keep the bookshelf in a dry environment and away from direct sunlight or extreme temperature changes to prevent warping or damage to the wood and metal components.
