onerbl AC Power Cord Replacement

onerbl AC Power Cord Replacement Manual

For ALLPOWERS Portable Power Stations

1. Introduction

This manual provides essential information for the safe and effective use of your onerbl AC Power Cord Replacement. This cable is designed to replace the original AC power cord for various ALLPOWERS Portable Power Stations, enabling you to power your device or charge its internal battery from standard electrical outlets.

Compatible Models:

- ALLPOWER ALLPOWERS R600, R1500, R2500, R3500, R4000, B3000 Portable Power Station
- AP-SS-010, AP-SS-010-MAX, AP-SS-011, AP-SS-005-Pro

2. Safety Information

Please read and understand all safety instructions before using the AC power cord. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- **Do not** use the power cord if it is damaged, frayed, or has exposed wires.
- **Do not** attempt to modify or repair the power cord. Contact customer support if assistance is needed.
- **Do not** expose the power cord to water, excessive moisture, or extreme temperatures.
- Ensure the power cord is fully inserted into both the power station and the wall outlet. A loose connection can cause overheating.
- **Do not** overload electrical outlets.
- Keep the power cord away from children and pets.
- Always unplug the power cord by grasping the plug, not the cable.

3. Setup

Follow these steps to properly connect your onerbl AC Power Cord to your ALLPOWERS Portable Power Station.

1. Ensure your ALLPOWERS Portable Power Station is turned off.
2. Locate the AC input port on your ALLPOWERS Portable Power Station.
3. Insert the female end of the onerbl AC Power Cord into the AC input port of your power station. Ensure a firm and secure connection.

4. Insert the male end (Type A plug) of the onerbl AC Power Cord into a standard, grounded electrical wall outlet.
5. Once connected, you can turn on your ALLPOWERS Portable Power Station to begin charging or powering devices.

Image: The onerbl AC Power Cord, showing its male and female ends, ready for connection to a power station and a wall outlet.

4. Operating

The onerbl AC Power Cord functions as a direct replacement for your original power cable. Once properly connected as described in the Setup section, it facilitates the transfer of AC power from a wall outlet to your ALLPOWERS Portable Power Station.

- The cable converts AC power from the wall outlet into the DC power required by your power station for charging its internal battery or operating connected devices.
- Always ensure the power station's input specifications match the output capabilities of the wall outlet and the cable's rating (1800 watts maximum).

5. Maintenance

Proper care and maintenance will extend the life of your onerbl AC Power Cord.

- **Cleaning:** Disconnect the cord from all power sources before cleaning. Wipe the cable and plugs with a dry, soft

cloth. Do not use liquid cleaners or solvents.

- **Storage:** When not in use, coil the cable loosely. Avoid tight coiling or bending, which can damage internal wires. Store in a cool, dry place away from direct sunlight and extreme temperatures.
- **Inspection:** Periodically inspect the cable for any signs of damage, such as cuts, fraying, or discoloration. If damage is found, discontinue use immediately and replace the cable.

6. Troubleshooting

If you encounter issues with your AC power cord, refer to the following common problems and solutions.

- **Power Station Not Charging:**
  - Ensure both ends of the power cord are securely plugged in.
  - Verify the wall outlet is functional by testing it with another device.
  - Check the power cord for any visible damage. If damaged, replace it.
  - Confirm your ALLPOWERS Portable Power Station is turned on and its AC input is enabled (if applicable).
- **Loose Connection:**
  - Ensure the female end of the cord is fully inserted into the power station's AC input.
  - Ensure the male end is fully inserted into the wall outlet.
- **Overheating:**
  - If the cord or plugs feel excessively hot, immediately unplug both ends.
  - Check for loose connections or overloaded circuits.
  - Discontinue use if overheating persists and contact support.

If these steps do not resolve the issue, please contact onerbl customer support.

7. Specifications

Feature	Detail
Brand	onerbl
Connector Gender	Male-to-Female
Plug Format	Type A
Item Length	6 Feet
Plug Type	Type A
Maximum Wattage	1800 watts
Manufacturer	Shenzhen Waweis Technology Co., Ltd
Input Voltage (AC)	100~120V~15A Max, 220~240V~6.8A Max (*as per product description, for compatible devices*)

8. Warranty and Support

This onerbl AC Power Cord Replacement is designed for reliability and performance. While specific warranty details are not provided in this manual, standard return policies typically apply for new products.

For product support, technical assistance, or warranty inquiries, please contact the retailer where the product was purchased or refer to the official onerbl website for contact information.

Return Policy: Please refer to the retailer's return policy for details regarding returns or exchanges. A typical return window of 30 days may apply.
