## 2. SAFETY INSTRUCTIONS

- Read all instructions before using the appliance.
- Do not immerse the main unit, cord, or plug in water or other liquids.
- Keep the appliance out of reach of children. Close supervision is necessary when used near children.
- Unplug from the outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts, and before cleaning the appliance.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.
- Do not use attachments not recommended by the appliance manufacturer.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Extreme caution must be used when moving an appliance containing hot water.
- Always attach the plug to the appliance first, then plug the cord into the wall outlet. To disconnect, turn any control to 'off', then remove the plug from the wall outlet.
- This appliance is for household use only.
- The appliance features automatic overheat protection, which will shut off the unit if it detects excessive

heat.

### 3. PRODUCT COMPONENTS

Familiarize yourself with the parts of your Lifelong LLEEB09 Electric Egg Boiler:

Image 3.1: Detachable Parts of the Egg Boiler

- **Top Cover:** Transparent lid that covers the eggs during boiling.
- **Egg Tray (Shelf):** Holds up to 7 eggs securely during the boiling process.
- **Measuring Cup:** Used to measure the precise amount of water required for different egg consistencies.
- **Heating Plate (Bowl):** The main unit where water is added and heated.
- **Power Button with LED Indicator:** Activates the boiling process and indicates operation status.

### 4. SETUP

Before first use, ensure all packaging materials are removed. Wash the egg tray, measuring cup, and top cover with warm, soapy water. Rinse thoroughly and dry. Wipe the heating plate with a damp cloth. Ensure the appliance is placed on a stable, heat-resistant surface.

## 5. OPERATING INSTRUCTIONS

### 5.1. General Operation

1. Using the provided measuring cup, add the desired amount of water to the heating plate. The water level determines the egg's doneness.
2. Place the egg tray onto the heating plate.
3. Carefully place up to 7 eggs onto the egg tray. You may use the piercing pin on the bottom of the measuring cup to gently pierce the larger end of each egg to prevent cracking during boiling.
4. Cover the appliance with the top cover.
5. Plug the power cord into a suitable electrical outlet.
6. Press the power button to start the boiling process. The LED indicator will illuminate.
7. Once the water has evaporated and the eggs are cooked, the appliance will automatically shut off, and the LED indicator will turn off.
8. Carefully remove the top cover (use caution as steam will be hot) and then the egg tray.
9. Rinse the cooked eggs under cold water to stop the cooking process and make them easier to peel.

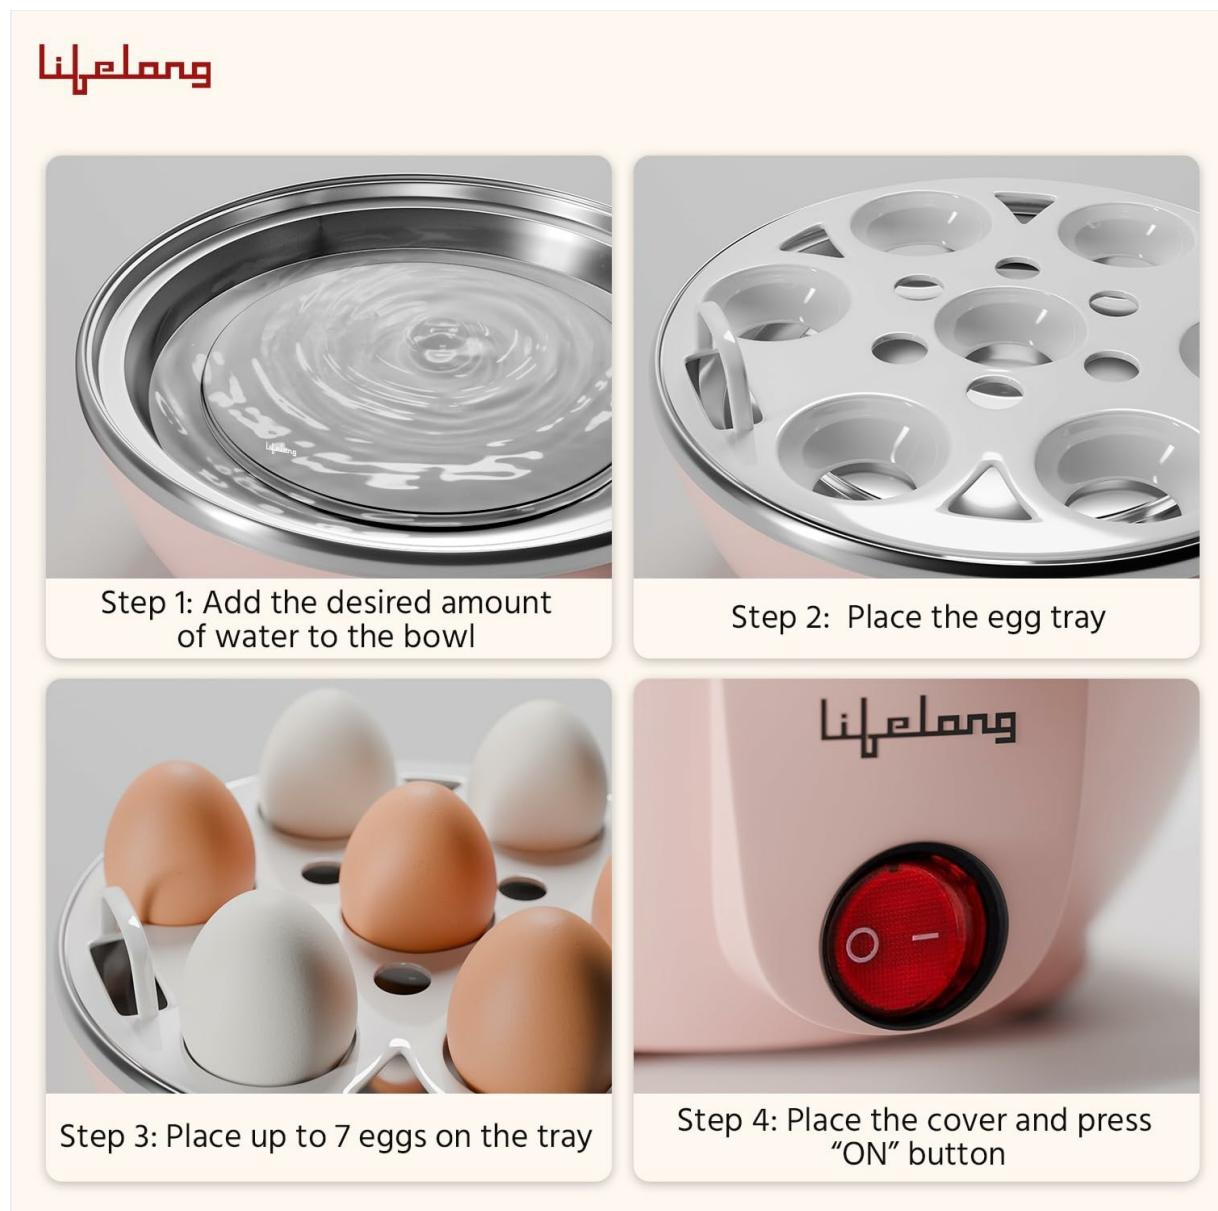

Image 5.1: Step-by-Step Usage Guide

## 5.2. Boiling Modes

The Lifelong LLEEB09 offers three boiling modes, controlled by the amount of water added using the measuring cup:

Image 5.2: Water Levels for Different Boiling Modes

- **Soft Boil:** Fill water up to the **25mL mark** on the measuring cup. This yields eggs with a runny yolk and soft whites.
- **Medium Boil:** Fill water up to the **50mL mark** on the measuring cup. This results in eggs with a creamy, partially set yolk.
- **Hard Boil:** Fill water up to the **75mL mark** on the measuring cup. This produces fully cooked eggs with firm yolks and whites.

**Note:** Adjust water levels slightly based on egg size and personal preference. For poaching, use the appropriate water level for your desired doneness and place eggs directly into the poaching cups (if included, or use a separate poaching accessory).

## 6. MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and longevity of your egg boiler.

1. Always unplug the appliance from the power outlet and allow it to cool completely before cleaning.
2. Remove the top cover and egg tray. These parts can be washed with warm, soapy water. Rinse thoroughly and dry.
3. Wipe the heating plate with a damp cloth. For stubborn mineral deposits (scale) on the heating plate, you can use a solution of white vinegar and water. Let it sit for a few minutes, then wipe clean. Do not use abrasive cleaners or scouring pads, as they may damage the surface.
4. Do not immerse the main unit (heating plate base) in water or any other liquid.
5. Ensure all parts are completely dry before reassembling or storing the appliance.

## 7. TROUBLESHOOTING

If you encounter any issues with your Lifelong LLEEB09 Electric Egg Boiler, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Appliance does not turn on.	Not plugged in; power outlet faulty; power button not pressed.	Ensure the appliance is securely plugged into a working outlet. Press the power button firmly.
Eggs are not cooked to desired doneness.	Incorrect water amount used; egg size variation.	Refer to Section 5.2 for correct water measurements. Adjust water slightly for larger or smaller eggs, or for personal preference.
Eggs crack during boiling.	Eggs too cold; not pierced.	Allow eggs to come to room temperature before boiling. Gently pierce the larger end of each egg with the pin on the measuring cup.
White residue on heating plate.	Mineral deposits from water (scale).	Clean the heating plate with a solution of white vinegar and water as described in Section 6.

## 8. SPECIFICATIONS

<b>Model Number</b>	LLEEB09
<b>Brand</b>	Lifelong
<b>Power</b>	350 Watt
<b>Capacity</b>	7 Eggs
<b>Material</b>	Plastic
<b>Color</b>	Pink
<b>Product Dimensions (L x W x H)</b>	15.2 x 15.2 x 15.2 Centimeters
<b>Item Weight</b>	380 Grams

**Included Components**

1 Egg Boiler, 1 User Manual
