LOOM TREE® Motorcycle Dashboard Screen Protector

INSTRUCTION MANUAL

1. Introduction

This manual provides detailed instructions for the installation, operation, and maintenance of your LOOM TREE® Motorcycle Dashboard Screen Protector. Designed to safeguard your motorcycle's instrument cluster, this protector offers superior defense against scratches, dust, heat, and UV rays, ensuring the longevity and clarity of your dashboard display.

1.1. Product Overview

The LOOM TREE® Motorcycle Dashboard Screen Protector is a high-quality PVC film engineered for durability and clarity. It is designed to be smooth to the touch, anti-scratch, and easy to clean, maintaining optimal visibility of your speedometer and other dashboard readings.

FOR YAMAHA TRACER 9 / GT 2021-

1.2. Compatibility

- Fit for Tracer 9 GT: 2021-2022 models
- Fit for Tracer 9: 2021-2022 models

1.3. Key Features

- Protects cluster screen from scratches, dust, heat, and UV rays.
- Easy to clean surface.
- Made from durable and solid PVC material.
- Smooth touch and anti-scratch properties.

2. What's in the Box

Your package contains the following items:

- 2 Pieces Motorcycle Dashboard Screen Protector

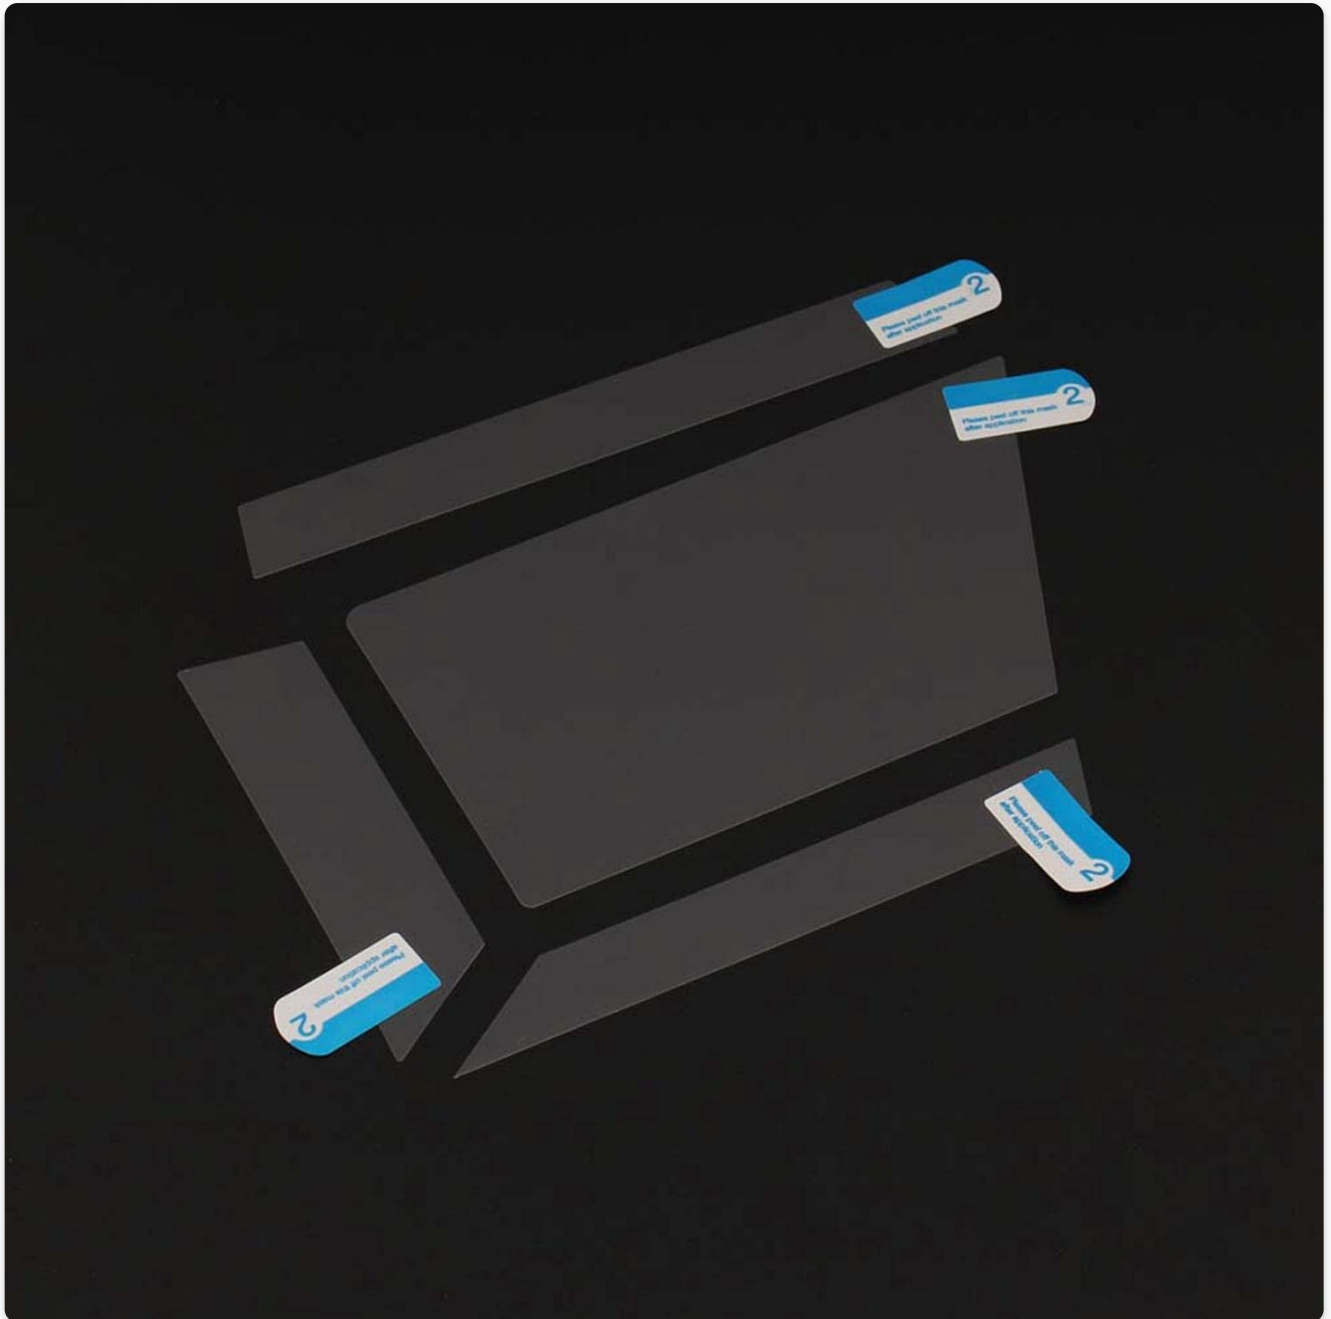

Image: Two individual LOOM TREE Motorcycle Dashboard Screen Protectors, as they appear when unboxed, with their protective films visible.

3. Setup (Installation Guide)

Follow these steps carefully to ensure a bubble-free and perfectly aligned installation of your screen protector.

1. **Clean the Dashboard Surface:** Thoroughly clean the motorcycle dashboard screen using a microfiber cloth and a gentle, non-abrasive cleaner. Ensure there is no dust, dirt, or fingerprints. Allow the surface to dry completely.
2. **Prepare the Protector:** Identify the protective layers. Typically, there are two layers: one on the adhesive side (often labeled '1' or 'Back') and one on the top surface (often labeled '2' or 'Front').
3. **Peel Layer 1:** Carefully peel off the first protective layer (adhesive side) partially, exposing a small portion of the adhesive. Avoid touching the adhesive surface with your fingers.
4. **Align and Apply:** Align the exposed adhesive part of the screen protector with one edge of your dashboard screen. Once aligned, slowly and steadily lower the rest of the protector onto the screen, gradually peeling off

the remaining part of the first protective layer as you go.

- 5. **Remove Air Bubbles:** Use a squeegee or a credit card wrapped in a soft cloth to gently push out any air bubbles from the center towards the edges. Apply even pressure.
- 6. **Peel Layer 2:** Once the protector is fully adhered and free of bubbles, carefully peel off the second protective layer from the top surface. This will reveal the clear, final screen protector.
- 7. **Final Inspection:** Check for any remaining bubbles or dust. Small bubbles may disappear over 24-48 hours.

4. Operating

The LOOM TREE® Motorcycle Dashboard Screen Protector functions passively by providing a durable barrier over your motorcycle's instrument cluster. Once installed, it continuously protects the screen from physical damage, environmental elements, and maintains optical clarity for optimal viewing of your dashboard information.

5. Maintenance

5.1. Care and Cleaning

- To clean the screen protector, use a soft, damp cloth.
- Avoid using harsh chemicals, abrasive cleaners, or rough materials, as these can damage the protector's surface.
- For stubborn marks, a small amount of mild soap and water can be used, followed by drying with a clean, lint-free cloth.

6. Troubleshooting

6.1. Common Issues and Solutions

- **Bubbles After Installation:**
 - Small bubbles often disappear naturally within 24-48 hours as the adhesive cures.
 - For larger bubbles, gently lift the nearest edge of the protector and re-apply, pushing the bubble out with a squeegee.
- **Dust Under the Protector:**
 - This usually occurs if the screen was not thoroughly cleaned before installation. If dust is visible and bothersome, the protector may need to be carefully removed, the screen cleaned again, and a new protector applied.
- **Misalignment:**
 - If the protector is significantly misaligned, gently lift it from one corner and re-position it. Do this slowly to avoid stretching or damaging the film.

7. Specifications

Attribute	Detail
Brand	LOOM TREE
Model Number	LTIN67034552

Material	PVC
Color	Clear
Product Dimensions	12 x 6 x 10 cm
Item Weight	200 g
Country of Origin	Hong Kong
Assembly Required	No

8. Warranty and Support

8.1. Warranty Information

LOOM TREE® products are manufactured to high-quality standards. For specific warranty details, please refer to the product packaging or contact customer support. Generally, screen protectors are consumable items and may not carry an extensive warranty against wear and tear, but are covered against manufacturing defects upon arrival.

8.2. Customer Support

Should you have any questions, concerns, or require assistance with your LOOM TREE® Motorcycle Dashboard Screen Protector, please contact our customer support team:
