morabloomy 5FT Lighted Outdoor Nativity Set Instruction Manual

Model: 5FT Lighted Nativity Set

INTRODUCTION

This manual provides essential instructions for the safe assembly, operation, and maintenance of your morabloomy 5FT Lighted Outdoor Nativity Set. Please read this manual thoroughly before installation and retain it for future reference. The 5-foot nativity set is designed for both indoor and outdoor Christmas holiday displays, featuring LED lights for illumination. It includes ground stakes, zip ties, a water-resistant power cord, and an adapter for durability in outdoor environments.

SAFETY INFORMATION

- This outdoor Christmas decoration is not intended for use in heavy windy or rainy conditions.
- The power plug is not waterproof. Do not immerse the plug in water. Ensure the plug connection is protected from moisture.
- Always disconnect the power supply before performing any assembly, disassembly, or maintenance.
- Keep all electrical components away from water sources.
- Ensure all connections are secure before plugging in the unit.

PACKAGE CONTENTS

Verify that all components are present before beginning assembly:

- Nativity Scene Figures (Joseph, Mary, Baby Jesus, Manger, Star)
- Metal Frame Components
- LED Light Strands (pre-attached)
- Ground Stakes
- Zip Ties

- Water-Resistant Power Cord
- Power Adapter

SETUP INSTRUCTIONS

The installation process is designed to be straightforward and requires no additional tools. Follow these steps for proper assembly:

1. **Unpack Components:** Carefully remove all items from the packaging. It is recommended to retain the original packaging for off-season storage.
2. **Assemble Figures:** Connect the individual nativity scene figures (Joseph, Mary, Baby Jesus, Manger, Star) to form the complete display. The figures are typically designed to interlock or connect with provided metal connections.
3. **Secure Connections:** Use the provided zip ties to further secure any connections between the figures and the frame, ensuring stability.

4. **Positioning:** Place the assembled nativity scene in your desired outdoor location. Ensure the ground is relatively level.
5. **Ground Anchoring:** Insert the ground stakes through the designated loops or holes at the base of the figures and firmly into the ground. This will help prevent the display from toppling over, especially in light winds.
6. **Power Connection:** Connect the water-resistant power cord to the LED light strands. Then, connect the power cord to the power adapter.
7. **Plug In:** Plug the power adapter into a suitable outdoor electrical outlet. Ensure the outlet is protected from weather elements.

Figure 3: The nativity set can also be used for indoor decoration, as shown here next to a Christmas tree.

OPERATING INSTRUCTIONS

Once assembled and plugged in, the LED lights of the nativity set will illuminate, creating a warm and festive display. There are no complex operating controls; simply plug it in to turn on and unplug to turn off.

Video 1: A brief demonstration of a lighted nativity scene, showcasing its illuminated appearance at night. This video highlights the visual effect of the LED lights on the display.

Video 2: An overview of a 6FT nativity scene set, demonstrating its size and illuminated features. This video provides a good visual reference for the product's scale and lighting.

MAINTENANCE

To ensure the longevity and optimal performance of your nativity set, follow these maintenance guidelines:

- **Cleaning:** Gently wipe the figures with a soft, dry cloth to remove dust or debris. Avoid using harsh chemicals or abrasive cleaners.
- **Storage:** After the holiday season, carefully disassemble the set and store it in its original packaging in a cool, dry place. This helps protect the material and lights from damage.
- **Weather Protection:** While the set is designed for outdoor use, prolonged exposure to extreme weather conditions (heavy rain, strong winds, blizzards) can cause damage. Consider bringing the set indoors or securing it extra firmly during severe weather.
- **Glitter Awareness:** The figures are covered with glitter fabric. Be aware that some glitter may shed during handling and setup.

Figure 4: Close-up of the weather-resistant fabric, highlighting its texture and how it appears both unlit and illuminated.

TROUBLESHOOTING

If you encounter any issues with your nativity set, refer to the following common problems and solutions:

- **Lights Not Working:**

- Check if the power adapter is securely plugged into a working electrical outlet.
- Ensure all connections between the power cord, adapter, and light strands are firm.
- Inspect the power cord for any visible damage or cuts.
- Verify that the outlet is receiving power by testing it with another device.

- **Display Instability:**

- Ensure ground stakes are fully inserted into the ground.
- Use additional zip ties to reinforce connections between figures and the frame if needed.
- If placing on a hard surface, consider weighting the base of the figures to prevent tipping.

- **Glitter Shedding:**

- This is normal for glitter-covered items. Handle with care during setup and storage.

SPECIFICATIONS

Brand	morabloomy
Model	5FT Lighted Nativity Set
Frame Material	Iron
Light Color	Warm White
Product Dimensions (L x W x H)	75 x 35 x 1 inches
Item Weight	14.02 pounds
