SETUP AND INSTALLATION

Proper installation of the control panel is crucial for safe and effective operation. Always ensure the appliance is disconnected from power before beginning any installation procedures.

Safety Precautions

- Always disconnect power to the appliance by unplugging it or turning off the circuit breaker before installation or maintenance.
- Wear appropriate personal protective equipment (PPE), such as gloves, to prevent injury.
- Handle the control panel with care to avoid damage to electronic components.
- If unsure about any step, consult a qualified technician.

Installation Steps

1. Disconnect the washer from its power source by unplugging it or turning off the circuit breaker.
2. Access the existing control panel. This may involve removing screws or clips securing the old panel.
3. Carefully disconnect all wiring harnesses and connectors from the old control panel. Note their positions for re-connection.
4. Remove the old control panel.
5. Align the new ForeverPRO WH22X29543 control panel with the mounting points.
6. Reconnect all wiring harnesses and connectors to the new control panel, ensuring a secure fit.
7. Secure the new control panel in place using the original screws or clips.
8. Restore power to the washer.
9. Test the control panel functions to ensure proper operation.
