9. TROUBLESHOOTING

If you encounter issues with your projector, refer to the following common problems and solutions:

- **No Power:**

- Ensure the power cord is securely connected to both the projector and the power outlet.
- Check if the power outlet is functioning correctly.
- Press the power button firmly.

- **No Image/Signal:**

- Verify that the correct input source (HDMI, USB, AV) is selected on the projector.
- Check the connection cables between the projector and the source device.
- Ensure the source device is powered on and outputting a signal.

- **Blurry Image:**

- Allow the auto-focus feature to adjust. If needed, slightly move the projector to trigger re-focusing.
- Ensure the projection surface is flat and the projector is positioned correctly.
- Check for any obstructions in front of the lens.

- **No Sound:**

- Increase the volume on both the projector and the source device.
- If using external speakers, ensure they are properly connected via Bluetooth or the audio jack.
- Check if the audio output setting on your source device is configured correctly.

- **Remote Control Not Working:**

- Replace the batteries in the remote control.
- Ensure there are no obstructions between the remote and the projector's IR receiver.

10. MAINTENANCE

- **Cleaning the Lens:** Use a soft, lint-free cloth specifically designed for optical lenses. Do not use abrasive cleaners or cloths.

- **Cleaning the Projector Body:** Wipe the exterior with a soft, dry cloth. For stubborn dirt, use a slightly damp cloth and then dry thoroughly.
- **Ventilation:** Ensure the ventilation vents are clear of dust and debris to prevent overheating. Do not block the vents during operation.
- **Storage:** When not in use for extended periods, store the projector in a cool, dry place, ideally in its original packaging or a protective case.
