CARE AND MAINTENANCE

Proper care will ensure the longevity and appearance of your kitchen island.

- **Cleaning the Countertop:** The marble-pattern veneer top is water-resistant and easy to clean. Wipe spills immediately with a soft, damp cloth. For stubborn marks, use a mild, non-abrasive cleaner. Avoid harsh chemicals or abrasive scrubbing pads.
- **Cleaning the Cabinetry:** Wipe down the white engineered wood surfaces with a soft, damp cloth. Dry immediately to prevent moisture damage.
- **Hardware:** Periodically check and tighten any loose screws on handles, hinges, and drawer slides. Clean stainless steel handles with a soft cloth and appropriate cleaner if necessary.
- **Avoid Excessive Heat:** While the countertop is temperature resistant, it is advisable to use trivets or hot pads under hot dishes to prevent potential damage.
- **Protect from Scratches:** Use cutting boards for food preparation and avoid dragging sharp or heavy objects across the surface.

TROUBLESHOOTING

This section addresses common issues you might encounter during assembly or use.

Assembly Issues

- **Missing or Misaligned Pre-drilled Holes:** If you find that pre-drilled holes for components like door hinges are missing or misaligned, carefully mark the correct position and use a small drill bit to create pilot holes. Ensure the drill bit is smaller than the screw diameter to prevent splitting the wood. Avoid forcing screws into misaligned holes.
- **Difficulty Aligning Components:** Ensure all cam locks and dowels are correctly inserted. Do not fully tighten any fasteners until all major components are loosely fitted together. This allows for minor adjustments.
- **Wobbly Structure:** Double-check that all screws and fasteners are securely tightened. Ensure the island is placed on a level surface. If necessary, use shims under the base to stabilize it.

General Usage Issues

- **Drawers Sticking:** Check if the drawer slides are properly aligned and free of obstructions. Ensure the drawer is not overloaded.
- **Doors Not Closing Properly:** Inspect hinges for proper installation and alignment. Adjust hinge screws if necessary to ensure doors close flush with the cabinet frame.
