Futanwei P110 Screen Protector

Futanwei Screen Protector for Onaneag P110 / TAEPOK P110 Smartwatch - User Manual

Model: P110 Screen Protector

1. Product Overview

This manual provides instructions for the Futanwei Screen Protector, designed to protect the display of your Onaneag P110 or TAEPOK P110 Smartwatch.

1.1 Package Contents

- 5 x Smartwatch Screen Protectors

1.2 Compatibility

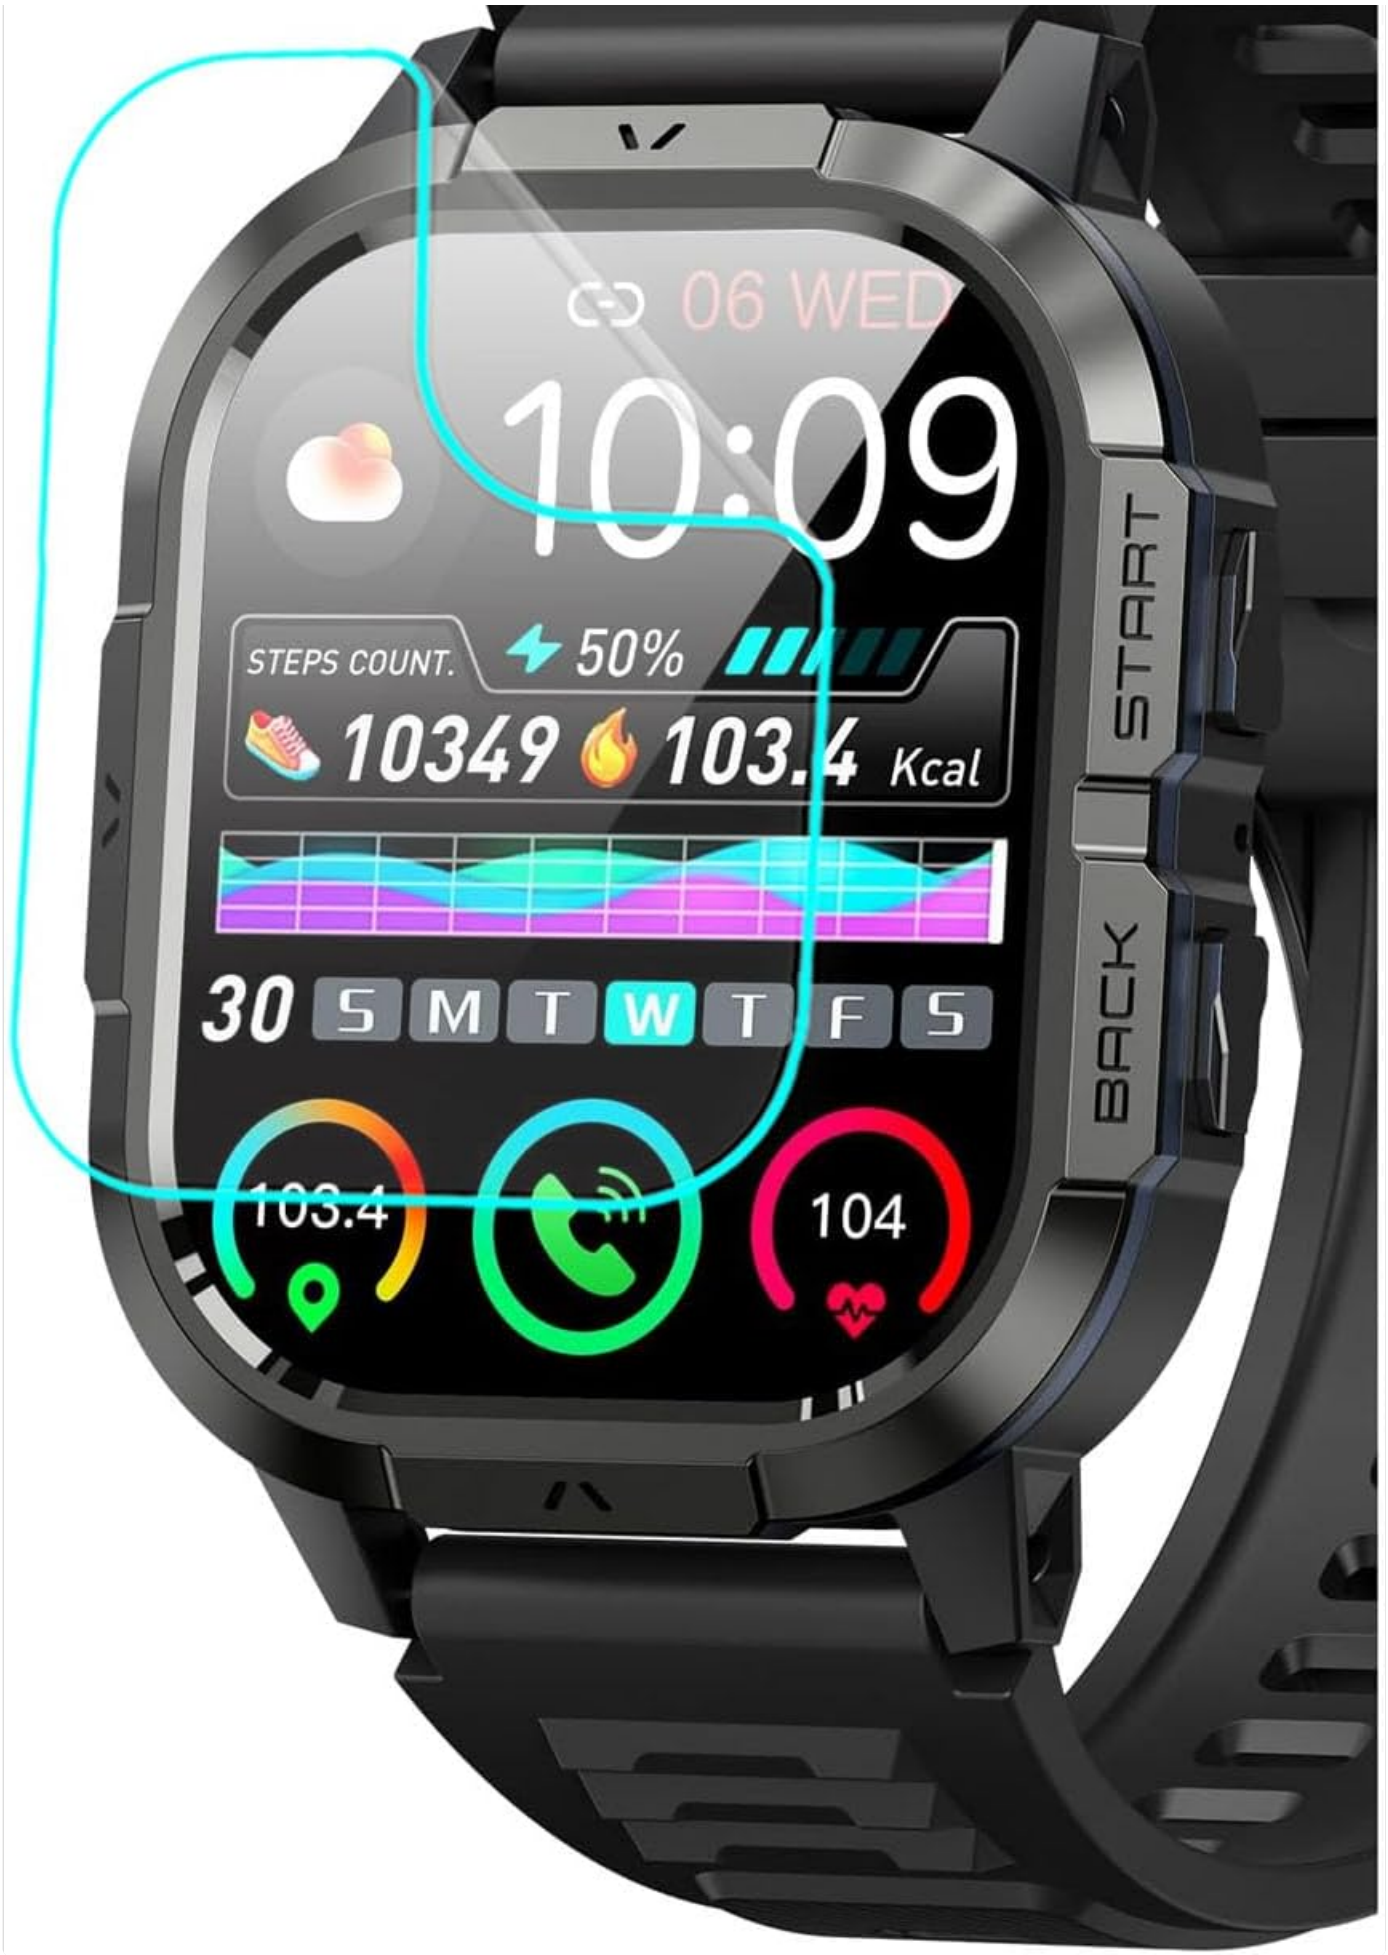

This screen protector is specifically designed for the **Onaneag P110** and **TAEPOK P110 Smartwatches** with a 2.06-inch screen. It is **not compatible** with FITVII H56 (1.7 Inches) Smart Watch or other devices.

2. Installation Guide

Follow these steps for a bubble-free installation. Ensure your smartwatch screen is clean and free of dust before application.

1. **Clean the Screen:** Use a microfiber cloth to thoroughly clean the smartwatch screen. Remove any dust, smudges, or fingerprints.
2. **Align the Protector:** Carefully peel off the first protective layer (usually marked "Step 1" or similar) from the screen protector. Align the protector with the edges of your smartwatch screen.
3. **Apply and Smooth:** Once aligned, gently lay the protector onto the screen. Use a squeegee or a soft card wrapped in cloth to smooth out any air bubbles, working from the center outwards.
4. **Remove Top Layer:** Peel off the second protective layer (usually marked "Step 2" or similar) from the top of the installed screen protector.
5. **Final Check:** Inspect the screen for any remaining bubbles. Small bubbles may disappear naturally within a few hours due to the self-healing properties of the film.

This image illustrates the screen protector placed on a smartwatch, highlighting its precise fit and coverage.

3. Product Features and Usage

The Futanwei Screen Protector offers advanced protection and maintains optimal screen functionality.

3.1 Key Features

- **High Transparency:** 99% high transparency ensures bright and colorful image quality, preserving the original visual experience.
- **Touch Sensitivity:** Designed for high responsiveness, allowing comfortable and sensitive touch interaction with your smartwatch screen.
- **Oleophobic & Hydrophobic Coating:** Protects against sweat, oil residue, and fingerprints, keeping your screen clean.
- **Anti-Scratch:** Provides robust protection against scratches and daily wear.
- **Bubble Self-healing Film:** Minor air bubbles that may appear immediately after application will naturally disappear within a few hours.

This diagram visually explains the benefits of the screen protector, such as its responsive touch, resistance to bubbles, and anti-fingerprint

properties due to the oleophobic coating.

4. Care and Maintenance

To ensure the longevity and clarity of your screen protector:

- **Cleaning:** Gently wipe the screen protector with a soft, lint-free cloth. For stubborn smudges, slightly dampen the cloth with water or a screen cleaner designed for electronics.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, solvents, or harsh chemicals, as these can damage the oleophobic coating and the film itself.
- **Replacement:** If the screen protector becomes heavily scratched or damaged, replace it with a new one from the 5-pack to maintain optimal screen protection and clarity.

5. Troubleshooting

5.1 Common Issues and Solutions

- **Bubbles After Installation:**
  Solution: Small bubbles are common immediately after installation. Due to the self-healing nature of the film, these should disappear naturally within a few hours. For larger bubbles, gently lift the nearest edge of the protector and re-apply, smoothing out the bubble.
- **Dust Under the Protector:**
  Solution: This indicates the screen was not perfectly clean before application. Carefully lift the protector, use a dust-absorber sticker to remove the dust, and re-apply.
- **Reduced Touch Sensitivity:**
  Solution: Ensure the protector is applied smoothly without air gaps. If the issue persists, verify that the protector is correctly aligned and not interfering with the smartwatch's sensors.

6. Product Specifications

Feature	Detail
Compatible Models	Onaneag P110, TAEPOK P110 Smartwatch (2.06 Inches)
Material	Thermoplastic Polyurethane (TPU)
Package Quantity	5 Screen Protectors
