## SETUP AND ASSEMBLY

This hall tree is designed for straightforward assembly. All parts are labeled, and easy-to-follow instructions are included to guide you through the process. Assembly typically takes approximately 1.5 to 3 hours for one person. For optimal ease and speed, it is highly recommended to use a power drill for tightening screws rather than the manual screwdriver that may be provided.

The unit comes with protective silicone feet on the bottom, which facilitate easy movement across various floor types, such as LVP flooring, without causing scratches. An extra set of hands can be beneficial during certain assembly steps due to the unit's overall weight and size.
