PIXEL K80 Bi-Color

Pixel K80 Bi-Color LED Video Light Kit Instruction Manual

Model: K80 Bi-Color | Brand: PIXEL

INTRODUCTION

This manual provides detailed instructions for the safe and effective operation of your Pixel K80 Bi-Color LED Video Light Kit. Please read this manual thoroughly before use and retain it for future reference.

Image: The complete Pixel K80 Bi-Color LED Video Light Kit, including two LED panels, two light stands, a wireless remote control, two power adapters, and a carrying bag.

PACKAGE CONTENTS

Verify that all items listed below are included in your package:

- 2 x K80 Bi-Color Video Lights
- 2 x Light Stands
- 2 x Power Adapters
- 1 x Carrying Case
- 1 x Remote Controller

Image: An overhead view of all included components: two K80 LED lights, two light stands, two power adapters, one remote control, and the carrying bag.

PRODUCT FEATURES

- **Bi-Color LED Panel:** Equipped with 600 LEDs (300 white/300 warm), offering a color temperature range of 3000K to 8000K.
- **Dimmable Brightness:** Adjustable from 0% to 100% with a maximum illuminance of 4500 LM/1m.
- **High Color Rendering Index (CRI):** CRI 97+ ensures accurate color reproduction.
- **Wireless Remote Control:** Allows adjustment of brightness, color temperature, channel, and group settings.
- **Master and Slave Function:** Supports 48 channels and 6 groups for synchronized control of multiple lights.
- **Dual Power Options:** Operates via AC power adapter for indoor use or NP-F series batteries (not included) for outdoor use.
- **Portable Design:** Includes an all-in-one carrying bag for convenient transport and storage.

SETUP INSTRUCTIONS

1. Assemble the Light Stand:

Extend the legs of the light stand to a stable position. Adjust the height using the locking knobs. Ensure all sections are securely tightened.

Image: A diagram illustrating the stable tripod light stand, showing its adjustable height from 28 to 80 inches, and the light panel dimensions.

2. Attach the LED Panel:

Mount the K80 LED video light onto the top of the light stand. Secure it using the stand fixing knob on the U-bracket of the light panel. Adjust the rotation knob to set the desired angle.

Image: A close-up of the K80 LED light panel, highlighting its various components including the barn doors, rotation adjustment knob, battery option, ON/OFF adapter, U bracket, stand fixing knob, LCD display screen, adjust knob, and DC port.

3. Power Connection:

- **AC Power (Indoor Use):** Connect the power adapter to the DC port on the LED light and then plug it into a wall outlet.
- **Battery Power (Outdoor Use):** Insert two compatible NP-F series batteries (e.g., NP-F950 or higher, not included) into the battery slots on the back of the light panel.

Dual Power Options

Image: A visual representation of the two power options: connecting the power adapter for indoor use and inserting NP-F Li-ion batteries for outdoor use.

OPERATING INSTRUCTIONS

1. Power On/Off

Locate the ON/OFF switch on the light panel and toggle it to power the unit on or off. When using the remote, setting brightness to 0% will effectively turn off the light output, but the unit remains powered.

2. Adjusting Brightness and Color Temperature

Use the adjust knob on the back of the light panel or the wireless remote control to modify settings.

- **Brightness:** Rotate the knob or use the remote to adjust brightness from 0% to 100%.
- **Color Temperature:** Rotate the knob or use the remote to adjust color temperature from 3000K (warm) to 8000K (cool).

Bi-Color & Dimmable LED Light

Image: A visual demonstration of the bi-color and dimmable features, showing how the light output changes across different color temperatures (3000K, 5600K, 8000K) and brightness levels (100% down to 1%).

3. Wireless Remote Control

The included wireless remote allows for convenient adjustment of light parameters from a distance.

- **Channel/Group Selection:** Use the 'CH' and 'GP' buttons on the remote to select the desired channel (1-48) and group (A-F).
- **Parameter Adjustment:** Use the remote's controls to adjust brightness and color temperature.

Note:

- The remote cannot physically turn off the light; it only sets brightness to 0%. Manually turn off the light using the switch on the panel.
- For wireless control, ensure both the light and the remote are set to the same channel and group.

Wireless Remote Control

48 Channels
(1-48)

6 Groups
(A-F)

Image: A hand holding the wireless remote control, with its LCD screen displaying current settings (e.g., 100% brightness, 5600K color temperature, Channel 48, Group A-F). The image also shows two K80 lights in a studio setup, indicating remote functionality.

4. Master and Slave Function

Any K80 light can act as a master to control other K80 lights. To use this function:

1. Set all lights you wish to control to the same channel and group.
2. Adjust settings on one light (the master), and the other lights (slaves) in the same channel and group will synchronize.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the light panel and remote control. Do not use abrasive cleaners or solvents.
- **Storage:** When not in use, store the kit in the provided carrying bag in a cool, dry place, away from direct sunlight and moisture.

- **Battery Care:** If using NP-F batteries, remove them from the light when storing for extended periods to prevent leakage.
- **Heat Dissipation:** Ensure the ventilation holes on the light panel are not obstructed during operation to prevent overheating.

Image: A diagram illustrating the heat dissipation mechanism on the back of the LED light panel, showing arrows indicating airflow to prevent overheating.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Light does not turn on.	No power, loose connection, or depleted batteries.	Check power adapter connection or ensure batteries are charged and correctly inserted. Verify the ON/OFF switch is in the 'ON' position.
Remote control not working.	Incorrect channel/group, remote batteries depleted, or obstruction.	Ensure the remote and light are on the same channel and group. Replace remote batteries. Remove any obstructions between the remote and the light's sensor.
Lights not synchronizing (Master/Slave).	Lights are on different channels or groups.	Verify all lights intended for synchronization are set to the identical channel and group.
Light output is inconsistent or flickers.	Low battery power or unstable power supply.	If using batteries, replace or recharge them. If using AC power, check the power source for stability.

SPECIFICATIONS

- **Model:** K80 Bi-Color
- **LED Quantity:** 600 (300 white, 300 warm)
- **Power:** 45W
- **Color Temperature:** 3000K-8000K (adjustable)
- **Brightness Range:** 0-100% (dimnable)
- **Maximum Illuminance:** 4500 LM/1m
- **CRI:** 97+
- **Channels:** 48

- **Groups:** 6 (A-F)
- **Power Source:** DC 15V (via power adapter) or 2 x NP-F series batteries (not included)
- **Product Dimensions:** 9.8 x 9.5 x 0.8 inches (light panel)
- **Item Weight:** 17.01 pounds (total kit)
- **Connectivity Technology:** Infrared (for remote)

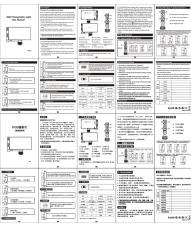

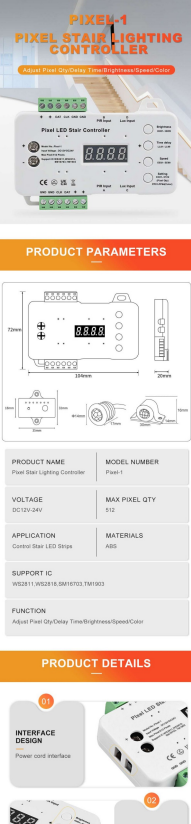

WARRANTY AND SUPPORT

For warranty information and technical support, please refer to the warranty card included with your product or visit the official PIXEL website. Keep your purchase receipt as proof of purchase for any warranty claims.
