KikkaBoo i-Secure Car Seat User Manual

Model: 31002100075

Brand: KikkaBoo

INTRODUCTION

The KikkaBoo i-Secure car seat is designed to provide superior protection and comfort for your child from birth up to 12 years of age (corresponding to 40-150 cm or 0-36 kg). This versatile car seat meets the highest i-Size safety standards, ensuring maximum safety and ease of use for parents.

It offers flexible seating options that adapt to your child's growth, supporting both rear-facing installation (from 40 to 105 cm) and forward-facing installation (from 76 to 150 cm). The seat features multiple recline positions in both orientations for optimal comfort.

KEY FEATURES

- **i-Size Safety Standard:** Tested and certified by TÜV SÜD according to UN Regulation No. R129/03, ensuring compliance with the latest safety requirements.
- **360° Rotation System:** Allows easy rotation of the seat for convenient placement and removal of the child, and seamless transition between rear-facing and forward-facing modes.
- **Adjustable Headrest:** Features a 12-position adjustable headrest that synchronizes in height with the harness, adapting effortlessly to your child's growth.
- **5-Point Harness System:** Provides secure restraint for your child.
- **ISOFIX System:** Ensures stable and secure installation in the vehicle.
- **SPS (Side Protection System):** Offers enhanced protection against side impacts.
- **Support Leg:** Adds extra stability and reduces rotation in case of impact.

- **Multiple Recline Positions:** 4 recline positions available for both rear-facing and forward-facing modes to ensure child comfort.
- **Full Body Support Cushion:** Provides additional comfort and support, especially for younger infants.

SETUP AND INSTALLATION

Proper installation is crucial for your child's safety. Always refer to your vehicle's owner's manual for specific car seat installation instructions and compatible seating positions.

ISOFIX Installation

The KikkaBoo i-Secure car seat features an ISOFIX system for secure and stable installation. Locate the ISOFIX anchor points in your vehicle's back seat.

1. Extend the ISOFIX connectors from the car seat base.
2. Align the connectors with the vehicle's ISOFIX anchor points and push firmly until you hear a click, indicating a secure connection. Check the indicators on the ISOFIX arms to ensure they show green.
3. Adjust the support leg to the vehicle floor, ensuring it is firmly planted and the indicator shows green.
4. Push the car seat firmly against the vehicle's backrest to remove any slack.

Rear-Facing Installation (40-105 cm)

For infants and toddlers up to 105 cm (approximately 4 years old), the car seat must be installed in the rear-facing

position. This provides the best protection for their developing neck and spine.

1. Ensure the car seat is rotated to the rear-facing position.
2. Follow the ISOFIX installation steps above.
3. Adjust the recline position to the most reclined setting suitable for your child's age and comfort.
4. Secure your child using the 5-point harness system.

Forward-Facing Installation (76-150 cm)

For children from 76 cm (approximately 15 months) up to 150 cm (approximately 12 years), the car seat can be installed in the forward-facing position. It is recommended to keep children rear-facing for as long as possible, ideally until they reach the maximum rear-facing height limit.

1. Ensure the car seat is rotated to the forward-facing position.
2. Follow the ISOFIX installation steps above.
3. Adjust the recline position as needed for your child's comfort.
4. For children using the 5-point harness (up to 105 cm), secure them with the harness. For children over 105 cm, the harness should be stored, and the child secured using the vehicle's 3-point seat belt.

OPERATING THE CAR SEAT

360° Rotation

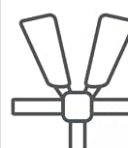

The 360° rotation feature allows for easy access to your child and simplifies switching between rear-facing and forward-facing modes. To rotate the seat:

1. Ensure the car seat is not reclined to its maximum position.
2. Locate the rotation lever at the front of the base.
3. Press the lever and rotate the seat to the desired position (facing the door for child placement, or rear/forward-facing for travel).
4. Release the lever and ensure the seat clicks securely into place.

Recline Positions

The car seat offers multiple recline positions for your child's comfort during travel. To adjust the recline:

1. Locate the recline adjustment lever, usually found under the front edge of the seat.
2. Press the lever and simultaneously push or pull the seat to the desired recline angle.
3. Release the lever and ensure the seat locks into position.

Harness and Headrest Adjustment

The 5-point harness and headrest adjust simultaneously to accommodate your growing child.

1. To adjust the headrest and harness height, locate the adjustment handle at the top of the headrest.

2. Squeeze the handle and slide the headrest up or down to the desired position. Ensure the harness straps are at or just below your child's shoulders for rear-facing, and at or just above for forward-facing.
3. Release the handle to lock the headrest and harness in place.
4. To tighten the harness, pull the adjustment strap at the front of the seat. To loosen, press the harness release button (usually under a flap) and pull the straps forward.

MAINTENANCE AND CARE

Regular cleaning and maintenance will prolong the life of your car seat and ensure continued hygiene for your child.

Cleaning the Fabric Covers

The fabric covers of the KikkaBoo i-Secure car seat are removable for easy cleaning.

1. Carefully remove the fabric covers from the car seat frame. Refer to the product manual for specific removal instructions.
2. Machine wash the covers on a gentle cycle with cold water and mild detergent. Do not use bleach.
3. Air dry the covers completely before reattaching them to the car seat. Do not tumble dry.

Image: The removable and washable fabric cover for easy maintenance.

Cleaning the Harness and Plastic Parts

- Wipe down the harness straps with a damp cloth and mild soap. Do not immerse the harness in water or machine wash, as this can weaken the webbing.
- Clean plastic parts with a damp cloth and mild soap. Avoid abrasive cleaners or solvents.
- Ensure all parts are completely dry before reassembling or using the car seat.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Car seat feels loose after installation.	ISOFIX connectors not fully engaged, support leg not properly extended, or seat not pushed firmly against vehicle seat.	Ensure ISOFIX indicators are green. Extend support leg until it's firm. Push seat firmly into vehicle backrest. Re-install if necessary.
Harness is difficult to tighten or loosen.	Harness straps are twisted, or adjustment mechanism is obstructed.	Untwist harness straps. Check for any obstructions around the adjustment strap or release button. Ensure child's clothing is not interfering.
Seat does not rotate 360°.	Rotation lever not fully pressed, or seat is in a reclined position that prevents rotation.	Ensure the rotation lever is fully depressed. Adjust the seat to a more upright recline position before attempting to rotate.
Headrest/harness adjustment is stiff.	Mechanism might be dirty or obstructed.	Check for any debris. Apply a small amount of silicone spray (not oil-based lubricants) if necessary, but generally, avoid lubricants. Ensure the adjustment handle is fully squeezed.

If you encounter any issues not listed here, please contact KikkaBoo customer support for assistance.
