Assembly of the T4TREAM Farmhouse Queen Size Bed Frame requires careful attention to detail. Please follow the steps below. An Allen wrench is typically included for assembly. A Phillips head screwdriver may also be required for some components.

### Assembly Steps

1. **Unpack and Identify Parts:** Carefully unpack all components and lay them out on a clean, soft surface. Compare them against the parts list provided in your packaging to ensure nothing is missing or damaged.
2. **Assemble the Headboard:** Attach the headboard panels and supports according to the instructions in your specific manual. Ensure all bolts are finger-tight initially.

3. **Assemble the Footboard:** Connect the footboard components. Note the 18-inch elevated design.
4. **Attach Side Rails:** Connect the side rails to both the headboard and footboard. Ensure the connections are secure and aligned.
5. **Install Center Support Beam and Legs:** Place the metal center support beam and attach its support legs. These provide crucial stability for the slat system.
6. **Install Wood Slats:** Lay the hardwood slats across the side rails and secure them using the provided fasteners. Ensure even spacing and proper alignment for optimal mattress support. The bed frame includes 30 hardwood slats.
7. **Assemble Storage Drawers:** Construct the two large storage drawers. Install the metal handles and ensure the smooth-gliding slides are correctly attached.
8. **Insert Drawers:** Slide the assembled drawers into their designated compartments at the foot of the bed. Test their smooth operation.
9. **Final Tightening:** Once all components are in place and aligned, systematically tighten all bolts and screws using the provided tools. Do not overtighten.

- Recommended mattress height is between 8 to 14 inches for optimal aesthetic and comfort with the 54-inch headboard.
- The 18-inch elevated footboard helps secure the mattress in place.

### Storage Drawers

The two spacious wooden drawers located at the foot of the bed provide convenient storage.

- To open, gently pull the metal handles. The smooth-gliding slides ensure easy access.
- These drawers are ideal for storing bedding, pillows, seasonal clothing, or other items to keep your bedroom organized.
- Drawer dimensions are approximately 27"W x 16"D x 5.7"H.

### Weight Capacity

The bed frame is designed to support a maximum weight of 900 lbs, including the mattress and occupants.

## Maintenance

### Cleaning

- Wipe the bed frame surfaces with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the finish.
- For the distressed wood grain finish, a dry cloth is often sufficient for dusting.
- The 6.1-inch underbed clearance allows for easy cleaning underneath the frame, including access for robotic vacuums.

### Fastener Checks

- Periodically (e.g., every 3-6 months), check all bolts and screws to ensure they remain tight. Retighten as necessary to maintain stability and prevent squeaking.

## Troubleshooting

- **Squeaking Noise:** If the bed frame squeaks, check all assembly bolts and screws. Tighten any loose connections. Ensure slats are properly seated and not rubbing against metal components.
- **Drawers Not Sliding Smoothly:** Verify that the drawer slides are correctly installed and free of obstructions. Ensure the drawers are not overloaded. Check for any debris in the tracks.
- **Bed Frame Feels Unstable:** Confirm that all support legs, especially the central ones, are making firm contact with the floor. Ensure all connections between the headboard, footboard, and side rails are fully tightened.
- **Missing Parts:** If any parts are missing upon arrival, contact T4TREAM customer support immediately with your purchase details.
