Required Tools (Not Included):

- Phillips Head Screwdriver
- Hammer (optional, for dowels)

Assembly Steps:

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out on a soft, clean

surface to prevent scratches. Compare each part to the included parts list to ensure nothing is missing.

2. **Assemble the Headboard:** Attach the headboard panels to the headboard posts using the specified hardware (e.g., bolts, barrel nuts). Ensure all connections are snug but do not overtighten initially.
3. **Assemble the Footboard:** Similar to the headboard, assemble the footboard components.
4. **Attach Side Rails:** Connect the side rails to the assembled headboard and footboard using the provided bolts and washers. Ensure the side rails are oriented correctly.
5. **Install Center Support Legs (if applicable):** If your model includes center support legs, attach them to the central support beam or directly to the side rails as per instructions.
6. **Place Bed Slats:** Lay the solid wood slats across the side rails. Secure them in place using the provided screws or connectors. The embedded design helps prevent mattress sliding.
