MAINTENANCE

Proper care and maintenance will extend the life of your Nectar Sleep System.

- **Mattress Cover:** The mattress features a removable cover. For cleaning, unzip and remove the cover. Follow the washing instructions on the care label. Ensure the cover is completely dry before reattaching.
- **Adjustable Base:** Wipe down the adjustable base frame with a damp cloth as needed. Avoid using harsh

chemicals or abrasive cleaners. Regularly check all connections and fasteners to ensure they are secure.

- **General Care:** Rotate your mattress periodically (e.g., every 3-6 months) to promote even wear, though flipping is not necessary for Nectar mattresses.

TROUBLESHOOTING

If you encounter any issues with your Nectar Sleep System, please refer to the following common solutions:

- **Base Not Responding:** Check if the power cord is securely plugged into both the wall outlet and the base. Ensure the remote control batteries are fresh and correctly inserted. Re-pair the remote if necessary, following the instructions in your base manual.
- **Unusual Noises:** Minor operational noises are normal. If you hear loud or persistent grinding/squeaking, inspect the moving parts for any obstructions or loose connections.
- **Mattress Not Fully Expanded:** Allow the full 24-72 hours for the mattress to expand after unboxing. Ensure it is placed on a flat surface. Cooler temperatures can slow expansion; a warmer room may help.
- **Massage Function Not Working:** Verify the base is powered and the remote is paired. Check if the massage timer is set.

THE BEST MATTRESS ARE ON THE WAY!

HOW TO SETTLE IN EASILY & HASSLE-FREE?

Step 1: It's easier to move if you take it out of the box
It's easier to move the mattress through your front door than through the back door. So, when you receive your new Nectar mattress, it's best to take it out of the box and move it to your bedroom.

Step 2: Opening your mattress
First, remove all of the air seals. Then, pull out the top of the mattress and the bottom of the mattress. This will allow the mattress to expand and settle in your bedroom.

Step 3: Watch it Expand
Once you've put it on your bed base, it will start to expand. It will take about 24 hours to fully expand. So, you can sleep on it right away.

Step 4: Be sure your bed base is ready!
If you have a bed base, make sure it's sturdy and can support the weight of the mattress. If you don't have a bed base, you can use a box spring or a solid foundation.

Step 5: Ventilate your room
After you've moved the mattress into your bedroom, it's important to ventilate the room. This will help the mattress settle in and keep the air fresh.

Step 6: Don't wash the cover!
The mattress cover is made of a special material that is designed to be durable and long-lasting. So, you don't need to wash it. Just use a vacuum cleaner to keep it clean.
