IMPORTANT SAFETY INFORMATION

WARNING: Failure to follow these safety instructions could result in injury or damage to the product.

- Do not exceed a total weight of 1000 pounds on the bed frame.
- Exercise caution around sharp edges on the steel slats and wooden headboard during assembly and use.
- Always follow the assembly instructions carefully to prevent instability or collapse of the bed frame.
- Ensure all connections for the charging station are secure before use.

SETUP AND ASSEMBLY

The iPormis Floating Twin Bed Frame is designed for easy and noise-free assembly. All necessary components, including the installation manual and tools, are packaged conveniently in one box.

Assembly Steps:

1. Unpack all components from the single box and verify against the included parts list in the installation manual.
2. Follow the step-by-step instructions provided in the dedicated installation manual. The buckle design facilitates a hassle-free setup.
3. Ensure all screws and fasteners are tightened securely to provide lasting stability.
4. The EVA material integrated with the slats and frame helps prevent creaks and noise once assembled.

OPERATING INSTRUCTIONS

LED Lighting System:

Your bed frame features an integrated RGB LED lighting system for ambient illumination. This includes one 21.6-foot RGB light strip for under-bed lighting and two 6-foot hidden light strips behind the headboard.

- **Control:** The LED lights can be controlled via a dedicated mobile application (APP) or the included remote control.
- **Color Options:** Choose from over 60,000 colors to customize your lighting experience.
- **Modes:** Utilize various modes such as Music Mode (lights react to sound), Mic Mode, and Timer Function for scheduled lighting.
- **Installation:** The LED strips are designed with Velcro for secure and sag-free attachment.

Charging Station:

The bed frame includes a built-in charging station located within the headboard's 4-inch storage space, allowing convenient access to power for your devices.

- **Outlets:** Two (2) AC outlets (110V/12A) for standard electrical devices.
- **USB Ports:** Two (2) USB ports (5V/2A), including one Type-A and one Type-C port, for charging mobile phones, tablets, and other USB-powered devices.
- **Power Cord:** The charging station is equipped with a 6-foot power cord.

MAINTENANCE

Regular maintenance will help prolong the life and appearance of your bed frame.

- **Cleaning:** Wipe down the wooden headboard and metal frame with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that could damage the finish.
- **LED Strips:** Periodically check the Velcro attachment of the LED strips to ensure they remain securely in place. If any section appears loose, re-press the Velcro firmly.
- **Charging Station:** Ensure the power cord is not pinched or damaged. Keep the outlets and USB ports free of dust and debris.
- **Structural Integrity:** Occasionally check all bolts and fasteners to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent noise.

TROUBLESHOOTING

This section addresses common issues you might encounter with your bed frame.

LED Lights Not Functioning:

- **Check Power:** Ensure the LED light power adapter is securely plugged into a working electrical outlet.
- **Remote/APP:** Verify that the remote control has working batteries or that the mobile application is correctly paired and functioning.
- **Connections:** Inspect the connections between the LED strips and the controller/power source for any disconnections.
- **Strip Damage:** Check the LED strips for any visible damage or breaks.

Charging Station Not Working:

- **Power Source:** Ensure the charging station's power cord is fully plugged into a functional wall outlet.
- **Device Compatibility:** Confirm that the device you are trying to charge is compatible with the charging station's output (e.g., 5V/2A for USB).
- **Cable Integrity:** Test with a different charging cable to rule out a faulty cable.
- **Reset:** Unplug the charging station from the wall outlet for a few minutes, then plug it back in to reset.

Bed Frame Noise/Instability:

- **Tighten Bolts:** Re-check and tighten all assembly bolts and screws, especially those connecting the frame sections and slats.
- **Level Surface:** Ensure the bed frame is placed on a flat, level surface. Uneven flooring can cause wobbling.
- **Slats:** Verify that all steel slats are properly seated and secured within their designated positions. The EVA material should minimize noise.
