## 3. SETUP AND INSTALLATION

### 3.1. Mounting the Screen

The device offers two primary mounting options: a customized bracket for console integration and a suction cup bracket for flexible placement.

#### 3.1.1. Customized Bracket Installation

The customized bracket is designed to integrate seamlessly with your car's center console, providing a stable and aesthetically pleasing installation. This bracket increases the contact area, enhancing stability and reducing the risk of detachment compared to traditional adhesive mounts. Ensure the bracket is securely fastened to the console.

## 3.1.2. Suction Cup Bracket Installation

For a more flexible mounting solution, use the provided suction cup bracket. This allows for placement on the dashboard or windshield. Ensure the surface is clean and dry before attaching the suction cup for maximum adhesion. The bracket offers 360-degree rotation and 270-degree tilt for optimal viewing angles.

### 3.2. Power Connection

Connect the device to your vehicle's power outlet using the provided car charger. Ensure the connection is secure to prevent power interruptions.

### 3.3. Backup Camera Installation

Install the rear camera at the back of your vehicle, ensuring it has a clear view. Connect the camera to the main unit using the 6-meter cable. The camera is IP68 waterproof, features a 140° wide angle, night vision, and displays parking lines to assist with reversing.

## 4. OPERATING INSTRUCTIONS

### 4.1. Power On/Off

The device will typically power on automatically when the vehicle's ignition is turned on. To power off, turn off the vehicle's ignition or disconnect the power supply.

### 4.2. Wireless Apple Carplay & Android Auto Connection

To connect your smartphone wirelessly:

1. Ensure Bluetooth and Wi-Fi are enabled on your smartphone.
2. On the Carplay screen, navigate to the Carplay or Android Auto interface.
3. Search for the device's Bluetooth name on your phone and pair.
4. Confirm the pairing on both devices. The system will then establish a Wi-Fi connection for full Carplay/Android Auto functionality.

Once connected, you can access your phone's compatible apps, music, and navigation directly on the Carplay screen.

### 4.3. Mirror Link

The Mirror Link feature allows you to project your smartphone's screen content onto the Carplay display. This is compatible with Apple Airplay and Android Cast. Follow your phone's instructions for screen mirroring and select the Carplay device.

#### 4.4. Voice Control

Utilize voice commands to interact with Siri (for Apple Carplay) or Google Assistant (for Android Auto). This allows for hands-free operation of functions such as making calls, playing music, or navigating. Activate voice control by saying the wake word (e.g., "Hey Siri" or "Hey Google") or by pressing the voice command button on the screen.

## 4.5. GPS Navigation

The device supports GPS navigation through connected Carplay or Android Auto applications. It provides accurate location services without requiring frequent map updates or additional fees. Ensure your smartphone's GPS is active for optimal performance.

## 4.6. Audio Output Options

The Carplay screen offers several methods for audio output:

- **Built-in Speakers:** The device has integrated speakers for direct audio playback.

- **Bluetooth:** Connect to your car's audio system via Bluetooth for higher quality stereo sound.
- **FM Transmitter:** Tune your car's FM radio to a specific frequency to receive audio from the Carplay screen.
- **AUX Output:** Use the provided AUX cable to connect the Carplay screen to your car's AUX input for a wired audio connection.

Image 4.4: Available audio output methods.

#### 4.7. Screen Brightness Adjustment

The 10.26-inch HD IPS display features an auto light sensor function. You can manually adjust the screen brightness to your preference. The device will retain this setting, helping to reduce eye strain and ensure clear

visibility during various lighting conditions.

## 5. MAINTENANCE

---

- **Cleaning:** Use a soft, dry cloth to clean the screen and device surface. Avoid abrasive cleaners or solvents.
- **Protective Film:** The product surface may have a removable protective film. If scratches or dirt appear, you can carefully peel off the outer layer of this film.
- **Storage:** When not in use for extended periods, store the device in a cool, dry place away from direct sunlight and extreme temperatures.

## 6. TROUBLESHOOTING

---

- **Device Not Powering On:** Ensure the car charger is securely connected to both the device and the vehicle's power outlet. Check the vehicle's power outlet for functionality.
- **Difficulty Pairing with Phone:** Ensure Bluetooth and Wi-Fi are enabled on your phone and the Carplay screen. Try restarting both devices. If issues persist, refer to your phone's Bluetooth settings to forget the device and attempt pairing again.
- **No Audio Output:** Verify the selected audio output method (Bluetooth, FM, AUX, Built-in Speaker) is correctly configured. If using FM, ensure your car radio is tuned to the correct frequency. If using AUX, ensure the cable is properly connected.
- **Screen Unresponsive:** If the touch screen is unresponsive, try restarting the device by disconnecting and reconnecting the power.
- **Customized Boot Icon Service:** If you require a customized boot icon, please refer to the contact information provided in the instruction manual for after-sale support.
