This image shows the cabinet mounted above a sink, with toiletries and decorative items on its open shelves and a towel hanging from the integrated rack. The mirrored door reflects the room, adding to the cabinet's functionality and style.

2. Safety Information

- Read all instructions carefully before assembly and installation.
- Keep all small parts and packaging materials away from children.
- Ensure the mounting surface is structurally sound and capable of supporting the cabinet's weight, plus the weight of its contents.
- Use appropriate tools and safety gear during installation (e.g., safety glasses, gloves).
- Do not overload the cabinet shelves or towel rack. Refer to specifications for weight limits (if available, otherwise general caution).
- Handle the mirror with care to avoid breakage and injury.
- Periodically check all mounting hardware to ensure it remains secure.

3. Package Contents

Please check that all components are present before beginning assembly.

4. Setup and Installation

Tools Required (Not Included): Pencil, Measuring Tape, Level, Drill, Drill Bits (appropriate for wall material), Screwdriver (Phillips head).

4.1 Unpacking and Part Identification

1. Carefully unpack all components and lay them out on a clean, soft surface to prevent scratches.
2. Verify all parts listed in Section 3 are present and undamaged.

4.2 Choosing a Mounting Location

Select a wall location that is suitable for the cabinet's dimensions and intended use. Ensure there are no hidden electrical wires or plumbing pipes in the drilling area.

Size:inch

Figure 2: Cabinet Dimensions.

This diagram provides detailed measurements of the cabinet, including overall width (28.85"), height (28"), depth (4.5"), mirror dimensions, and shelf spacing. Use these dimensions to plan your installation location.

4.3 Wall Mounting

1. Hold the cabinet against the wall at the desired height and use a pencil to mark the locations for the mounting screws. Use a level to ensure the cabinet is straight.
2. Drill pilot holes at the marked locations. The size of the drill bit should match the wall anchors (if used) or the diameter of the mounting screws.
3. Insert wall anchors into the pilot holes if mounting into drywall. For wood studs, anchors may not be necessary, but ensure screws are long enough to penetrate securely.
4. Align the cabinet with the drilled holes and secure it to the wall using the provided mounting screws. Tighten screws firmly but do not overtighten.

4.4 Installing Shelves and Towel Rack

1. **Adjustable Shelves:** The cabinet features adjustable shelves in the open compartment. Insert the shelf pins into the desired holes on the side panels, then place the shelves onto the pins.
2. **Towel Rack:** Attach the towel rack to the pre-drilled holes at the bottom of the cabinet using the provided screws. Ensure it is securely fastened.

Figure 3: Key Features.

This image highlights the cabinet's features: a beautiful metal handle for the mirrored door, adjustable shelves in the open storage section, the wide mirror, and the integrated towel rack at the bottom.

5. Operating Instructions

- **Mirrored Door:** Gently pull the metal handle to open the mirrored door. Push to close. Ensure the door closes completely to protect contents.
- **Storage Shelves:** Utilize the interior shelves behind the mirror and the open shelves for organizing toiletries, cosmetics, and other items. Distribute weight evenly.
- **Towel Rack:** Use the integrated rack to hang hand towels or washcloths.

Figure 4: Interior Storage View.

This image shows the cabinet with its mirrored door open, revealing the internal storage shelf. The open shelving unit on the right is also visible, displaying various bathroom essentials.

6. Maintenance and Care

- **Cleaning the Cabinet:** Wipe the engineered wood surfaces with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals, as they may damage the finish. The cabinet is designed to be waterproof, but excessive moisture should be wiped away promptly.
- **Cleaning the Mirror:** Use a standard glass cleaner and a lint-free cloth to clean the mirror. Spray cleaner onto the cloth, not directly onto the mirror, to prevent liquid from seeping into the edges.
- **Hardware Check:** Periodically check all screws and mounting hardware to ensure they are tight and secure. Retighten if necessary.

7. Troubleshooting

Problem	Possible Cause	Solution
Cabinet feels wobbly after installation.	Mounting screws are not fully tightened or wall anchors are insufficient.	Ensure all mounting screws are securely tightened. If using drywall anchors, verify they are correctly installed and appropriate for the weight. Consider locating wall studs for more secure mounting.
Mirrored door does not close properly.	Hinges may be misaligned or damaged. Cabinet may not be level.	Check if the cabinet is level. Inspect hinges for damage or loose screws and tighten as needed.
Shelves are not stable.	Shelf pins are not fully inserted or are incorrect size.	Ensure shelf pins are fully inserted into the designated holes and that shelves are resting securely on them.
